SECTION I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

- **Political Risk**

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

- **Economic Risk**

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

- **Foreign Currency Risk**

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

- **Convertibility and Transferability Risk**

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility

of the Foreign Investors.

Scheme Specific Risk Factors

1. Market Liquidity Risk

The liquidity of investments made in the Scheme may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have adequate market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing and/or liquidity demands on account of redemptions.

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

2. Credit Risk

Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavor to manage credit risk through in-house credit analysis.

Different types of securities in which the Scheme would invest as given in the SID carry different levels and types of credit risk. Accordingly, the Scheme's risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of credit risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

3. Term Structure of Interest Rates (TSIR) Risk

The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

4. Rating Migration Risk

Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

5. Re-investment Risk

The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which maturity proceeds & cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which these cash flows can be reinvested may be lower than that originally assumed.

6. Risk associated with floating rate securities

To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by: Interest rate movement (Basis Risk) - Coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk (i) to the extent of time gap in the resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture interest rate changes appropriately; Spread Movement (Spread Risk) - Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments; Settlement Risk (Counterparty Risk) - Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default; Liquidity Risk: The market for floating rate securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such securities that the Scheme is invested in.

7. Risk associated with derivatives

The Scheme may invest in fixed income derivatives for hedging and portfolio rebalancing or any other purposes as may be permitted under regulatory guidelines. The Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative as may be permitted by SEBI / RBI / such other Regulatory Authority from time to time.

The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Scheme volatility.

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:

- a. Counterparty Risk - this occurs when a counterparty fails to abide by its contractual obligations and therefore, the Schemes are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange
- b. Market Liquidity risk - this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- c. Model Risk - the risk of mispricing or improper valuation of derivatives
- d. Basis Risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged

Identification and execution of the strategies to be pursued involve uncertainty and decision of the Investment Manager may not always be profitable. No assurance can be given that the Investment Manager will be able to identify or execute such strategies.

8. Risk Factors Associated with Imperfect Hedging using Interest Rate Futures

- a. Basis Risk — risk associated with divergence in the price movement of the portfolio being hedged and the price movement of the derivative serving as the hedge e.g. a loss (gain) in the market value of bonds in the portfolio (or the part thereof that is being hedged), may be accompanied by a disproportionate gain (loss) in the market value of the derivatives being used to serve as the

hedge. This imperfect correlation between the two investments creates the potential for excess gains or losses in a hedging strategy, thus adding risk to the position.

- b. **Mispricing Risk, or improper valuation** – market circumstances may necessitate unwinding the derivative positions at sub-optimal prices during periods of market dislocation triggered by contagion or tumult e.g. if the expected upward trajectory of yields reverses course and begins to spiral downward, most participants with short Interest Rate Futures positions are likely to seek an unwinding, leading to a potential amplification in the adverse price movement, and impact therefrom.
- c. **Correlation weakening, and consequent risk of regulatory breach** – SEBI regulation mandates minimum correlation criteria of 0.9 (calculated on a 90 day basis) between the portfolio being hedged and the derivative serving as the hedge; in cases where this limit is breached (i.e. when the 90-day correlation falls below 0.9), a rebalancing period of 5 working days has been permitted.

Inability to satisfy this requirement within the stipulated period due to difficulties in re-balancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value; leverage is not permitted as per SEBI guidelines.

9. Risks Associated with Transaction in Units Through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE, or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE, or such other recognized exchange in this regard.

10. Risks associated with investments in Securitised Assets:

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

Some of the risk factors typically analyzed for any securitization transaction are as follows:

- **Risks associated with asset class:** Underlying assets in securitised debt may assume different forms and the general types of receivables include commercial vehicles, auto finance, credit cards, home loans or any such receipts. Credit risks relating to these types of receivables depend upon various factors including macro- economic factors of these industries and economies. Specific factors like nature and adequacy of collateral securing these receivables, adequacy of documentation in case of auto finance and home loans and intentions and credit profile of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

- **Risks associated with pool characteristics:**

- (a) **Size of the loan:** This generally indicates the kind of assets financed with loans. While a pool of loan assets comprising of smaller individual loans provides diversification, if there is excessive reliance on very small ticket size, it may result in difficult and costly recoveries.

- (b) **Loan to Value Ratio:** This Indicates how much percentage value of the asset is financed by borrower's own equity. The lower LTV, the better it is. This ratio stems from the principle that where the borrowers own contribution of the asset cost is high, the chances of default are lower. To

illustrate for a Truck costing Rs. 20 lakhs, if the borrower has himself contributed Rs.10 lakhs and has taken only Rs. 10 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs. 20 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only Rs. 2 lakhs out of his own equity for a truck costing Rs. 20 lakhs. Between the two scenarios given above, the later would have higher risk of default than the former.

(c) Original maturity of loans and average seasoning of the pool: Original maturity indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. Average seasoning indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loans, if a pool of assets consists of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than one where only 10% of installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.

(d) Default rate distribution: This indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is very obvious, as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.

- **Credit Rating and Adequacy of Credit Enhancement:** Unlike in plain vanilla instruments, in securitisation transactions, it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating. This is possible through a mechanism called "Credit enhancement". The process of "Credit enhancement" is fulfilled by filtering the underlying asset classes and applying selection criteria, which further diminishes the risks inherent for a particular asset class. The purpose of credit enhancement is to ensure timely payment to the investors, if the actual collection from the pool of receivables for a given period is short of the contractual payout on securitisation. Securitisation is normally non-recourse instruments and therefore, the repayment on securitisation would have to come from the underlying assets and the credit enhancement. Therefore, the rating criteria centrally focus on the quality of the underlying assets.

The Scheme will predominantly invest in those securitisation issuances which have AA and above rating indicating high level of safety from credit risk point of view at the time of making an investment. However, there is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

- **Limited Liquidity & Price Risk:** Presently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

- **Limited Recourse to Originator & Delinquency:** Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the seller or the originator, or the parent or any affiliate of the seller, issuer and originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the credit enhancement and thereby the investor payouts may get affected if the amount available in the credit enhancement facility is not enough to cover the shortfall. On persistent default of an obligor to repay his obligation, the servicer may repossess and sell the underlying Asset. However, many factors may affect, delay or prevent the repossession of such asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such asset may be sold may be lower than the amount due from that Obligor.

- **Risks due to possible prepayments: Weighted Tenor / Yield:** Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances;

- a. Obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- b. Receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or

- c. The servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same.
- d. In the event of prepayments, investors may be exposed to changes in tenor and yield.

- **Bankruptcy of the Originator or Seller:** If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to trust was not a sale then an investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a 'True Sale'. Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

- **Bankruptcy of the Investor's Agent:** If Investor's agent, becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an investor could experience losses or delays in the payments due under the agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent. Legal opinion is normally obtained to the effect that the Investors Agent's recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

- **Risk of co-mingling:** The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, the investors may be exposed to a potential loss. Due care is normally taken to ensure that the Servicer enjoys highest credit rating on standalone basis to minimize co-mingling risk.

- **Risks relating to tax incidence on securitization Special Purpose Vehicles:** In October 2011, the income tax authorities issued a claim on certain securitisation SPVs, stating that the gross income of such SPVs was liable to tax. The matter is presently under sub judice with the Bombay High Court. Several industry participants approached the Ministry of Finance (MoF) to seek clarity and reinforce the "pass through" status of a securitisation SPV. The Finance Bill, 2013, has sought to clarify the tax position by stating that securitisation SPVs are not liable to pay income tax. However, any tax incidence on gross income of SPVs could result in dilution of payouts to investors.

11. Risks associated with Overseas Investments

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

12. Risks associated with Real Estate Investment Trust (REIT) and Infrastructure Investment Trust (InvIT)

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in REITs and InvITs which carry the following risks:

- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as IDCWs or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things:
 - success and economic viability of tenants and off-takers

- economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
 - debt service requirements and other liabilities of the portfolio assets
 - fluctuations in the working capital needs of the portfolio assets
 - ability of portfolio assets to borrow funds and access capital markets
 - changes in applicable laws and regulations, which may restrict the payment of IDCWs by portfolio assets
 - amount and timing of capital expenditures on portfolio assets
 - insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents.
- **Price-Risk:** The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets
 - **Interest-Rate Risk:** Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
 - **Liquidity Risk:** This refers to the ease with which REIT/InvIT units can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists.

13. Risk associated with investments in repo of corporate debt securities

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- a. **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA
- b. **Collateral Risk:** In the event of default by the repo counterparty, the scheme have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

14. Risk factors associated with investments in Perpetual Debt Instrument (PDI)

Perpetual Debt instruments are issued by Banks, NBFCs and corporates to improve their capital profile. Some of the PDIs issued by Banks which are governed by the RBI guidelines for Basel III Capital Regulations are referred to as Additional Tier I (AT1 bonds). While there are no regulatory guidelines for issuance of PDIs by corporate bodies, NBFCs issue these bonds as per guidelines issued by RBI. The instruments are treated as perpetual in nature as there is no fixed maturity date. The key risks associated with these instruments are highlighted below:

- i) Risk on coupon servicing:

- Banks: As per the terms of the instruments, Banks have discretion at all times to cancel distributions/ payment of coupons.
- NBFCs: While NBFCs have discretion at all times to cancel payment of coupon, coupon can also be deferred (instead of being cancelled), in case paying the coupon leads to breach of capital ratios.
- Corporates: Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI.

ii) Risk of write-down or conversion into equity:

- Banks: As per current RBI guidelines, banks have to maintain a Common Equity Tier-1 (CET-1) ratio of minimum 5.5% of Risk Weighted Assets (RWAs), failing which the AT-1 bonds can get written down. Further, AT-1 Bonds are liable to be written down or converted to common equity, at the discretion of RBI, in the event of Point of Non Viability Trigger (PONV). PONV is a point, determined by RBI, when a bank is deemed to have become non-viable unless there is a write off/ conversion to equity of AT-1 Bonds or a public sector capital injection happens. The write off/conversion has to occur prior to public sector injection of capital. This risk is not applicable in case of NBFCs and Corporates

iii) Risk of instrument not being called by the Issuer:

- Banks: The issuing banks have an option to call back the instrument after minimum period of 5 years from the date of issuance and typically annually thereafter, subject to meeting the RBI guidelines. However, if the bank does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date.
- NBFCs: The NBFC issuer has an option to call back the instrument after minimum period of 10 years from date of issuance and typically annually thereafter, subject to meeting the RBI guidelines. However, if the NBFC does not exercise the call option the Scheme may have to hold the instruments for a period beyond the first call exercise date.
- Corporates There is no minimum period for call date. However, if the corporate does not exercise the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date

iv) Risk of rating downgrades: The Rating agencies, which rate the instruments, have a slightly different rating methodology for these Instruments compared to plain vanilla bonds. In the event of deterioration of the financial health of the Issuer or due to other reasons, the rating of the Perpetual Debt Instruments may be downgraded whilst the ratings of other bonds issued by the issuer may remain constant. In such a scenario, Perpetual Debt Instrument holders may incur losses on their investment

v) Liquidity risk: There may be no active market for the Perpetual Debt Instruments on the platform of the Stock Exchanges. As a result, the liquidity and market prices of the Perpetual Debt Instruments may fail to develop and may accordingly be adversely affected. There is no assurance that a trading market for the Perpetual Debt Instruments will exist and no assurance as to the liquidity of any trading market. The liquidity and market prices of the Perpetual Debt Instruments can be expected to vary with changes in market and economic conditions, financial condition and prospects and other factors that generally influence market price of such instruments. Such fluctuations may significantly affect the liquidity and market price of these instruments, which may trade at a discount to the price at which one purchases these instruments.

15. Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will

thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the scheme of DSP Mutual Fund to better generate liquidity during market dislocation to help the scheme fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that pursuant to SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 read with SEBI circular no. SEBI/HO/IMD/PoD2/ P/CIR/ 2023/152 dated September 06, 2023 & any other circulars/ guidelines/ letters issued by SEBI / AMFI from time to time, the calculations of Potential Risk Class (PRC) Matrix, asset allocation limits, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF wherever applicable. Additionally, in terms of aforesaid circular, the investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub- section "C. How will the Scheme allocate its assets?" And sub-section "D. Where will the Scheme Invest?" in Section "Section II- Information about the scheme".

RISK MANAGEMENT STRATEGIES

1. Market Liquidity Risk

The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity. Market Liquidity Risk will be managed actively within the portfolio liquidity limits.

2. Credit Risk

Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

3. Term Structure of Interest Rates (TSIR) Risk

The Investment Manager will endeavor to manage the duration based on the ensuing market conditions.

4. Rating Migration Risk

The endeavor is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.

5. Re-investment Risk

The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.

6. Risk associated with floating rate securities

There is very low liquidity in floating rate securities, resulting in lack of price discovery. Hence, incremental investments in floating rate securities are going to be limited.

7. Risk associated with derivatives

The guidelines issued by SEBI / RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.

8. Risks Associated with Overseas Investments

The portfolio is predominantly in INR denominated securities. Should there be investments in ADRs/GDRs of Indian companies or foreign securities, the investment process of the fund manager will ensure that a comprehensive company specific due diligence is performed.

9. Risks Associated with Real Estate Investment Trust (REIT) and Infrastructure Investment Trust (InvIT)

The Investment Manager endeavors to invest in REITS/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

10. Risk associated with investments in repo of corporate debt securities

The Investment Manager will endeavor to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles. These could include SEBI regulated mutual funds, RBI regulated Banks, Non-Banking Finance Companies, Primary Dealers and IRDA regulated Insurance companies. Corporates for whom credit limits have been assigned are eligible counterparties. These corporates should have a minimum investment grade credit rating. For new counterparties, approval from Head - Risk will be taken.

The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

11. Risk Management & Liquidity Management Tools

DSP mutual fund schemes as mandated wide various SEBI & AMFI circulars, have adopted the following for risk management & liquidity management tools

1. **Potential Risk Matrix (PRC) & Risk-o-meter:** Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investor are suggested to read about various disclosures under the section "C.PERIODIC DISCLOSURES" pertaining to "Compliance with Potential Risk Class Matrix norms" & "Risk-o-meter" to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries.
2. **Mandatory Liquidity requirement:** DSP mutual fund scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by

determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations.

3. **Stress testing the scheme portfolio:** The investment manager periodically stress test the scheme portfolio to addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI
4. **Swing Pricing:** DSP mutual fund scheme has Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in Section N. "Swing Pricing Framework".

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

The primary investment objective of the Scheme is to seek to generate regular income and capital appreciation commensurate with risk from a portfolio predominantly investing in corporate debt securities across maturities which are rated AA+ and above, in addition to debt instruments issued by central and state governments and money market securities.

However, there can be no assurance that the investment objective of the scheme will be realized.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instruments	Indicative Allocations (% of total assets)		Risk Profile
	Minimum	Maximum	
Corporate Bonds* (including securitized debt) which are rated AA+ and above	80%	100%	Low to Medium
Corporate Bonds* (including securitized debt) which are rated AA and below	0%	20%	Medium to High
Money Market Instruments and Debt Instruments issued By Central And State Governments	0%	20%	Low
Units issued by REITs and InvITs	0%	10%	Medium to High

*Corporate Debt would include all debt securities issued by entities such as Banks, Public Sector Undertakings, Municipal Corporations, Corporates, Companies etc. and would exclude investments in Government Securities and State Development Loans.

The scheme may also invest in derivatives instruments to the extent of 100% of the Net Assets as permitted vide SEBI Circular no. DNPd/Cir 29/2005 dated September 14, 2005 and SEBI Circular No. DNPd/ Cir-30/2006 dated January 20, 2006, SEBI circular No. SEBI/DNPd/ Cir-31/2006 dated September 22, 2006 and clause 12.24.1 and clause 12.25 of the SEBI Master Circular.

Under normal circumstances the Scheme shall not have an exposure of more than 35% of their net assets in foreign securities, subject to applicable regulatory limits.

The Scheme retains the flexibility to invest across all the securities in money market instruments as permitted by SEBI / RBI from time to time, including schemes of mutual funds.

The Scheme will participate in repo of corporate debt securities.

The cumulative gross exposure through debt, derivative positions (including fixed income derivatives), repo transactions in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the SEBI from time to time should not exceed 100% of the net assets of the scheme.

The Scheme shall duly comply with AMFI Best Practice Guideline Circular No. 93 of 2021-22 dated July 24, 2021 on prudential norms for liquidity risk management for open ended schemes debt schemes and such other clarifications and amendments issued from time to time in this regard.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Pursuant to SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 read with SEBI circular no. SEBI/HO/IMD/PoD2/ P/CIR/ 2023/152 dated September 06, 2023 & any other circulars/ guidelines/ letters issued by SEBI / AMFI from time to time, the calculations of Potential Risk Class (PRC) Matrix, asset allocation limits, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF wherever applicable. Additionally, in terms of aforesaid circular, the investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes.

Pending deployment of the funds of the Scheme shall be in terms of clause 12.16 of the SEBI Master Circular, the AMC may invest funds of the Scheme in short term deposits of scheduled commercial banks, subject to following conditions:

- e. The Trustee shall ensure that the funds of the Scheme are not invested in the short term deposits of a bank which has invested in the Scheme.
- f. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.
- g. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

Such deposits shall be held in the name of the Scheme.

Portfolio Rebalancing:

a. Action with respect to passive breaches:

As per clause 2.9 of the SEBI Master Circular and the clarifications/ guidelines issued by AMFI/ SEBI from time to time, in the event of deviation from mandated asset allocation mentioned, passive breaches (i.e. occurrence of instances not arising out of omission and commission of AMC), shall be rebalanced within 30 business days. Where the portfolio is not rebalanced within above mentioned period, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period.

In case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9.3 and 2.9.4 of the SEBI Master Circular dated May 19, 2023.

b. Action with respect to breaches arising due to defensive consideration:

In addition to above, any alteration in the investment pattern will be for a short term on defensive considerations in line with clause 1.14.1.2 of the SEBI Master Circular; the intention being at all times to protect the interests of the Unit Holders, asset allocation pattern can be altered for a short term period on defensive considerations.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

D. WHERE WILL THE SCHEME INVEST?

The investment focus will be on debt securities, which include, but are not limited to:

- Debt obligations of the statutory bodies, public sector undertakings, scheduled commercial banks, non-banking finance companies, development financial institutions, supra national financial institutions, corporate entities and trusts (securitised debt).
- Debt obligations of the Government of India, state and local governments, government agencies
- Interest rate and credit derivatives as permitted by SEBI
- Money market securities include commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, TREPs, repurchase agreement (repo), reverse repurchase agreement (rev-repo), Bills Rediscounting Scheme (BRDS) and any other like instruments as specified by the Reserve Bank of India from time to time
- Pass through, Pay through or other Participation Certificates, representing interest in a pool of assets including receivables
- The non-convertible part of convertible securities
- Units of Mutual funds as may be permitted by regulations
- Structured Notes.
- Any other like instruments as may be permitted by RBI/SEBI/such other Regulatory Authority from time to time.

From time to time, it is possible that the Investment Manager may decide to invest a higher proportion in debt and money market securities, depending on prevailing economic and market conditions and the need to adopt a defensive posture on the portfolio of the Scheme.

The securities mentioned in, “**Where will the Scheme(s) invest?**”, could be listed, to be listed, unlisted, privately placed, secured, unsecured, rated or unrated (subject to the rating or equivalency requirements discussed above) and of any maturity. The securities may be acquired through secondary market operations, primary issues/offerings, other public offers, Private Placement and negotiated deals amongst other mechanisms.

TREPs:

TREPs is a money market instrument that enables entities to borrow and lend against sovereign collateral security. The maturity ranges from 1 day to 90 days and can also be made available upto 1 year. Central Government securities including T-bills are eligible securities that can be used as collateral for borrowing through TREPs.

Repos:

Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds.

Investment in Domestic Securitized Debt

Depending upon the Investment Manager's views, the Schemes may invest in domestic securitized debt such as ABS or MBS. The investments in domestic securitized debt will be made only after giving due consideration to factors such as but not limited to the securitization structure, quality of underlying

receivables, credentials of the servicing agent, level of credit enhancement, liquidity factor, returns provided by the securitized paper vis-a-vis other comparable investment alternatives.

Although the returns provided by securitized debt could be higher, one must not lose sight of the fact that risks also exist with regard to investments in securitized debt. Investments in pass-through certificates of a securitization transaction represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the issuer or the seller, or the parent of the seller, or any affiliate of the seller or the issuer or the trustee in its personal capacity, save to the extent of credit enhancement to be provided by the credit enhancer. The trust's principal asset will be the pool of underlying receivables. The ability of the trust to meet its obligations will be dependent on the receipt and transfer to the designated account of collections made by the servicing agent from the pool, the amount available in the cash collateral account, and any other amounts received by the trust pursuant to the terms of the transaction documents. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only.

Delinquencies and credit losses may cause depletion of the amount available under the cash collateral account and thereby the scheduled payouts to the investors may get affected if the amount available in the cash collateral account is not enough to cover the shortfall.

Further Unit holders are requested to refer below the disclosure relating to investments in securitized debt, in the SEBI prescribed format:

(i) How the risk profile of securitized debt fits into the risk appetite of the scheme

The scheme seeks to generate an attractive return, consistent with prudent risk, from a portfolio which is substantially constituted of quality debt securities. The scheme also seeks to generate capital appreciation by investing a smaller portion of its corpus in equity and equity related securities of issuers domiciled in India.

In line with the investment objective, securitised debt instruments having a high credit quality commensurate with other debt instruments in the portfolio and in line with internal fund manager guidelines will be considered for investment.

(ii) Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The parameters used to evaluate originators are

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the originator as well as rating agency.

Critical Evaluation Parameters (for pool loan) regarding the originator / underlying issuer:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower - both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of re-schedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

(iii) Risk mitigation strategies for investments with each kind of originator

Analysis of originator: An independent Risk and Quantitative Analysis (RQA) team analyses and evaluates

each originator and sets up limits specifying both the maximum quantum and maximum tenor for investments and investments are considered only within these limits.

Originator analysis typically encompasses:

- Size and reach of the originator
- Collection process, infrastructure and follow-up mechanism
- Quality of MIS
- Credit enhancement for different type of originator

(iv) The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Eligible assets: Only assets with an established track record of low delinquencies and high credit quality over several business cycles will be considered for investment.

Analysis of pool: Characteristics such as average pool maturity (in months), average loan to value ratio, average seasoning of the pool, maximum single exposure, geographical distribution and average single exposure are studied to determine pool quality

Risk mitigating measures: Credit enhancement facilities (including cash, guarantees, excess interest spread, subordinate tranches), liquidity facilities and payment structure are studied in relation to historical collection and default behavior of the asset class to ensure adequacy of credit enhancement in a stress scenario.

(v) Minimum retention period of the debt by originator prior to securitization

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vi) Minimum retention percentage by originator of debts to be securitized

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vii) The mechanism to tackle conflict of interest when the Mutual Fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the Fund

The AMC has a rigorous credit due diligence process for all fixed income investments, which also encompasses securitized debt. A dedicated team of credit analysts is responsible for credit research and surveillance.

(viii) The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The AMC has a rigorous credit due diligence process for all fixed income investments, which also encompasses securitized debt. A dedicated team of credit analysts is responsible for credit research and surveillance. This includes:

- Detailed credit analysis of issuers: based on the management evaluation, operating strength and financial strength to determine suitability for investment. Periodic reviews on a quarterly/annual basis are undertaken for eligible issuers. Ratings are monitored on a daily basis and any changes are immediately recorded and suitable action taken. For securitized pool loan exposures, the analysis includes pool seasoning, pool asset quality, diversification, collateral margin, originator analysis and credit enhancement mechanisms. Pool performance statistics published by rating agencies are analyzed for performance of other securitised pools of the same originator as well as for the performance of the asset class as a whole. Regular interactions with the rating agencies are done to discuss performance trends. Documents are vetted by the legal and compliance team. In addition, payout reports from the

trustees are analysed for collection performance and adequacy of cash collateral

- The AMC monitors adherence to single and group level exposure norms, minimum rating requirements, liquidity requirements, and ensures that only eligible securities are included in the fund, in line with the scheme information document/internal templates.

Framework that is applied while evaluating investment decision relating to a pool securitization transaction:

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities; State Development Loans (SDL), bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 50 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. These debentures/commercial Papers are mostly rated by rating agencies like CRISIL, ICRA, CARE and India Ratings. There is an active and vibrant secondary market for these debentures/commercial Papers. These normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

Overview of Money Market in India

Money market instruments includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

Treasury bills are issued by the Government of India through regular weekly auctions, while Cash Management Bills are issued on an ad-hoc basis. They are mostly subscribed by banks, state governments, mutual funds and other entities. As on 22 Sep 2023, total outstanding treasury bills are Rs. 9,32,379 crore*.

Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 365 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 22 Sep 2023, outstanding Certificate of Deposits are Rs. 2,91,830 crore*. Certificate of deposits currently trade at a spread of around 45 basis points** over comparable treasury bills as on 29 Sep 2023, for a one-year tenor.

Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating). As on 15 Sep 2023, total outstanding Commercial Papers are Rs. 4,32,569 crore*. Commercial papers trade at around 75 basis points** over comparable treasury bills as on 29 Sep 2023, for a one-year tenor.

Call Money, TREPS and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, TREPS and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.

Investments in derivatives

SEBI has permitted all the mutual funds to participate in the derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Pursuant to this, the mutual funds may use various derivative and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities, and equities.

The fixed Income derivative market has made considerable progress in last two years. Interest rate swaps have become an integral part of Risk Management practice for most banks. Corporate Treasury have issued Innovative instruments like floating rate debt and constant maturity swaps.

➤ Interest Rate Swap (IRS)

Any swap is effectively an exchange of one set of cash-flows for another considered to be of equal value. If the exchange of cash flows is linked to interest rates, it becomes an interest rate swap.

An interest rate swap is an agreement between two parties to exchange future payment streams based on a notional amount. Only the interest on the notional amount is swapped, and the principal amount is never exchanged.

In a typical interest rate swap, one party agrees to pay a fixed rate over the term of the agreement and to receive a variable or floating rate of interest. The counterparty receives a stream of fixed rate payments at regular intervals as described in the agreement and pays the floating rate of interest. A fixed/ floating interest rate swap is characterized by:

1. Fixed interest rate;
2. Variable or floating interest rate, which is periodically reset;
3. Notional principal amount upon which total interest payments are based; and
4. The terms of the agreement, including a schedule of interest rate reset dates, payment dates and termination date.

The primary reason for engaging in an interest rate swap is to hedge the interest rate exposure. An illustration could be an institution having long-term fixed rate assets (longer tenor securities receiving fixed rate) in a rising interest rate environment; it can hedge the interest rate exposure by purchasing an interest rate swap where the institution receives floating interest rate and pays fixed rate. In this case, an interest rate swap is likely to reduce the duration and interest rate volatility of the fund.

Example:

➤ Interest Rate Futures

An Interest Rate Futures ('IRF') contract is "an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today." The underlying security for Interest Rate Futures is either Government Bond or T-Bill. Interest Rate Futures are Exchange traded and standardized contracts based on 6 year, 10 year and 13 year Government of India Security and 91-day Government of India Treasury Bill (91DTB). These future contracts are cash settled. These instruments can be used for hedging the underlying cash positions.

The overall gross exposure for a fund is computed as sum of exposure to equity, cash, debt instruments and derivatives (other than for hedging purposes) and it should not be more than 100%. Derivative position is considered to be for hedging purposes only if the following conditions are met:

1. Perfect Hedging - We hedge the underlying using IRF contract of same underlying
2. Imperfect hedging - the Underlying being hedged and the IRF contract has a 90 day correlation of closing prices of more than 90%. In case of correlation breaking at any time the derivative position would be counted as an exposure. SEBI allows maximum of 20% imperfect hedging.

For example, assume a portfolio comprising the following structure:

Security	Amount (crs)	Price (Rs)
IGB 6.79% 2027	100	100.40
IGB 6.79% 2029	50	98.35
IGB 7.72% 2025	25	104.55
Cash	25	
Total	200	

Assuming the fund manager intends to hedge the portfolio using IRF and uses contracts on IGB 6.79% 2027 as it is most liquid.

Maximum imperfect hedging allowed, based on SEBI limit of 20% for the above fund is $200 \times 20\% = 40$ crs

Maximum perfect hedging using 6.79% 2027 is 100 crs (as amount of 6.79% 2027 in the fund is 100 crs)

Total hedge the fund can do = 100 crs + 40 crs = 140 crs

Assuming the 90 day historical correlation between the instruments in the portfolio are as follows

90 day historical correlation	IGB 6.79% 2027	IGB 6.79% 2029	IGB 7.72% 2025
IGB 6.79% 2027	1	0.95	0.80
IGB 6.79% 2029	0.95	1	0.75
IGB 7.72% 2025	0.80	0.75	1

Given that we are using IRF on 6.79% 2027, we can hedge 6.79% 2029 using IRFs as correlation is more than 90% upto 40 crs (based on the 20% limit of imperfect hedging).

Since one contract of IRF has a notional of Rs. 2 lakhs, in this example the fund manager sells Rs. 140 crores / 2 lakhs = 7000 contracts, to hedge his position.

Hence after hedging the fund is as shown below:

Security	Amount (crs)	Price (Rs)	Comments
IGB 6.79% 2027	100	100.40	100% hedged - Perfect hedging

IGB 6.79% 2029	50	98.35	40% hedged - Imperfect hedging
IGB 7.72% 2025	25	104.55	Unhedged
Cash	25		Unhedged
IRF 6.79% 2027	140	100.35	
Total	200		

At maturity of the Interest Rate Futures

Case 1: bonds close higher than at the time the hedge was entered into

Security	Amount (crs)	Price before hedging(Rs)	Price on maturity of hedge (Rs)	Gain	Net Gain (lakhs)
IGB 6.79% 2027	100	100.4	100.5	0.1	10.00
IGB 6.79% 2029	50	98.35	98.5	0.15	7.50
IGB 7.72% 2025	25	104.55	104.6	0.05	1.25
Cash	25				-
Without IRF					18.75
IRF 6.79% 2027	140	100.35	100.5	-0.15	(21.00)
Total With IRF	200				(2.25)

Case 2: bonds close lower than at the time the hedge was entered into

Security	Amount (crs)	Price before hedging	Price on maturity of hedge (Rs)	Gain	Net Gain (lakhs)
IGB 6.79% 2027	100	100.4	100.3	-0.1	(10.00)
IGB 6.79% 2029	50	98.35	98.23	-0.12	(6.00)
IGB 7.72% 2025	25	104.55	104.5	-0.05	(1.25)
Cash	25				-
Without IRF					(17.25)
IRF 6.79% 2027	140	100.35	100.3	0.05	7.00
Total with IRF	200				(10.25)

As can be seen in the cases above, in case yields move higher, IRFs help in reducing the loss to the fund.

With respect to investments made in derivative instruments, the Scheme shall comply with the following exposure limits in line with clause 12.24.1 and clause 12.25 of the SEBI Master Circular:

- The cumulative gross exposure through equity, debt, derivative positions (including commodity and fixed income derivatives), repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time should not exceed 100% of the net assets of the scheme. However, the following shall not be considered while calculating the gross exposure:
 - Security-wise hedged position and
 - Exposure in cash or cash equivalents with residual maturity of less than 91 days
- The total exposure related to option premium must not exceed 20% of the net assets of the Scheme.
- The Mutual Fund shall not write options or purchase instruments with embedded written options.
- Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.

L. INVESTMENT BY THE AMC:

In terms of sub-regulation 16(A) in Regulation 25 of SEBI (Mutual Funds) Regulations, 1996 read along with clause 6.9 of the SEBI Master Circular dated May 19, 2023 and AMFI Best Practice Guidelines Circular No.100 /2022-23 dated April 26, 2022 on 'Alignment of interest of AMCs with the Unitholders of the Mutual Fund

schemes', the AMC shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the SEBI from time to time.

Pursuant to regulation 43A of SEBI (Mutual Funds) Regulations, 1996 and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, AMC shall make a one-time contribution equivalent to 2 bps of the AUM of the specified debt oriented schemes as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days of request from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

In case of delay in contribution by the Scheme and AMC, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.

M. CREATION OF SEGREGATED PORTFOLIO IN CASE OF CREDIT EVENT:

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a) Downgrade of a debt or money market instrument to 'below investment grade', or
 - b) Subsequent downgrades of the said instruments from 'below investment grade', or
 - c) Similar such downgrades of a loan ratingIn case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio.
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) Creation of segregated portfolio is optional and is at the discretion of the AMC. It shall be created only if the Scheme Information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures.

Process for Creation of Segregated Portfolio:

- 1) On the date of credit event, AMC should decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it should:
 - a) seek approval of trustees prior to creation of the segregated portfolio.
 - b) immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The Fund will also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC.
 - c) ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a) Segregated portfolio will be effective from the day of credit event
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d) The NAV of both segregated and main portfolios will be disclosed from the day of the credit event.
 - e) All existing investors in the scheme as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.

- f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.
 - g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
 - h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- 3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.
 - 4) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Processing of Subscription and Redemption Proceeds:

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as under:

- i. Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio

- 1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event.

Risks associated with segregated portfolio

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.

3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Disclosure Requirements:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Mutual Fund and the Scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph 7(d) and 7(e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees:

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
 - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

N. Swing Pricing Framework

SEBI introduced swing pricing framework for open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) through clause 4.10 of the SEBI Master Circular. The swing pricing is made applicable only for scenarios related to net outflows from the schemes. Further the SEBI Master Circular mandates full swing during market dislocation times for high risk open ended debt schemes.

Pursuant to the SEBI Master Circular the below swing pricing framework will be adapted during the market dislocation times. Currently, Fund has decided not to adopt policy pertaining to swing pricing during normal times.

Meaning of Swing Pricing:

Swing pricing refers to a process of adjusting scheme's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market.

Swing pricing can be a useful mechanism to contribute to protect the interests of existing investors, specifically from the dilution of their holdings and value of the investor's capital and thus contribute to protect the value of the investors capital. Swing pricing mechanism is a tools which can help protect remaining investors during any of the below instances when:

- Any large investors choose to redeem where their actions would have material market impact costs
- More active trading takes place for the scheme or
- Scheme hold illiquid assets.

Market Dislocation:

SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto. SEBI shall notify once market dislocation is declared that swing pricing will be applicable for a specified period. Subsequent to the announcement of market dislocation, the swing pricing framework shall be mandated only for open ended debt schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) in terms of clause 4.10.4.2 of the SEBI Master Circular, which :

- a. has High or Very High risk on the risk-o-meter in terms of clause 17.4 of the SEBI Master Circular (as of the most recent period at the time of declaration of market dislocation) and
- b. classifies themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix in terms of clause 17.5 of the SEBI Master Circular .

Swing Threshold:

Swing threshold refers to a pre-determined threshold set in terms of percentage of AUM that trigger the adjustment in the NAV (swinging of the NAV). During the market dislocation times swing pricing will be adapted when the scheme has net outflow irrespective of any swing threshold. Swing pricing shall be made applicable to all unitholders at PAN level for (redemptions and subscriptions) except for for redemptions up to INR 2 lacs for each mutual fund scheme.

Swing factor:

Swing factor refers to adjustment factor set in terms of percentage by the extent NAV is adjusted / swung. As per clause 17.5 of the SEBI Master Circular, the PRC matrix assigned to DSPBF, DSPSBF and DSPCBF is B-III and hence mandatory swing during market dislocation, in case of net outflow from the schemes, the NAV would be adjusted (swung) downwards by 1.50 %.

Disclosures pertaining to NAV adjusted for swing factor:

The Scheme performance shall be computed based on Scheme NAV before Swing adjustment i.e. the unswung NAV.

Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMCs in following format in SIDs and in scheme wise Annual Reports and Abridged summary and the same may be disclosed on website prominently only if swing pricing framework has been made applicable for the said mutual fund scheme.

O. Compliance with Potential Risk Class Matrix norms

In line with clause 17.5 of the SEBI Master Circular, the PRC of the Scheme based on interest rate risk and credit risk of the Scheme is being classified.

Further, the investors are requested to note following in accordance with the SEBI Master Circular read along with the clarification issued by AMFI:

- (i) when PRC cell classification is changed into a cell with either a higher interest rate risk or credit risk, mutual funds shall intimate to all unit holders about the change in the PRC value post completion of the fundamental attribute change (FAC) process. This shall be in addition to the intimation to unit holders about the proposed FAC and the 30-day exit period, prior to the change.
- (ii) the change in the PRC value due to investment actions, price changes, rating changes, etc. shall be determined as part of the day-end post trade compliance check and if the day end PRC value

is higher than the maximum risk specified for either of the risks, it shall be rebalanced within a period specified in the Scheme Information Document of the Scheme. Such rebalancing shall be monitored by the Investment Management Committee of the AMC. However, the rule relating to maximum residual maturity of the instrument as per clause 19 of the SEBI Master circular shall be part of pre-trade checks. Further, only a permanent change in the PRC positioning of a scheme into a higher risk cell will be regarded as a FAC.

IDCW warrants shall be dispatched to the Unit Holders within 7 working days from record date for IDCW. In the event of delay/failure to dispatch the IDCW warrants within the aforesaid period, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

13. Redemption

Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre- printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement. The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of Official Points of Acceptance are mentioned at the end of this SID. As all allotments are provisional, subject to realisation of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

A Unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction form.

It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment at any point of time.

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 3 working Days from the date of acceptance of redemption or repurchase.

Unit Holders are encouraged and advised to submit their requests for bank mandate/ Multiple Bank Accounts Registration request atleast 10 business days prior to date of redemption / IDCW payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis.

The redemption payment will be issued in favour of the sole/ first Unit Holder's registered name and bank account number, if provided. Payment via cheque, where issued, will be sent to the address of the sole/first Holder registered with the fund at the time of dispatch entirely at the risk of the unit holder. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of redemption proceeds will be borne by the Unit Holder. With a view to safeguarding their interest, it is mandatory that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCW will be despatched by a reasonable mode of despatch like courier, post, UCP, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor), entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

In case of redemptions, Unit holders should note that Two Factor Authentication [2FA] is mandatory for all redemption / switches including STP/SWP submitted through electronic mode. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs or by a foreign currency draft drawn at the then rates of exchange less bank charges, subject to RBI procedures and approvals.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

Redemption by investors transacting through the Stock Exchange mechanism

Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE, failing which the transaction will be rejected. Investors shall seek redemption requests in terms of number of Units only and not in Rupee amounts. Redemption amounts shall be paid by the AMC to the bank mandate registered with the Depository Participant. Refer "Transaction in Units through Stock Exchange mechanism" under 'B.
