I. INTRODUCTION

A. RISK FACTORS

1) Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the Securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Mutual Funds, like Securities investments, are subject to market and other risks and there can be no guarantee against loss resulting from an investment in the Scheme nor can there be any assurance that the Scheme's objectives will be achieved.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme.
- Edelweiss ASEAN Equity Off-shore Fund is only the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1,00,000 (One Lakh Indian Rupees) made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return scheme.

2) Scheme Specific Risk Factors:

(a) Risk factors for a Fund of Funds Scheme

- The Scheme will be investing primarily in shares / units of the Underlying fund, which in turn invests in equity securities of companies of countries which are members of Association of South East Asian Nations (ASEAN) and those that are domiciled in, or carrying out the main part of their economic activity in, an ASEAN country. The Scheme's performance will predominantly depend upon the performance of the Underlying fund.
- Any change in the investment policy or the fundamental attributes of the Underlying fund will affect the performance of the Scheme.
- Investments in the Underlying fund, which is an equity fund, will have all the risks associated with investments in equity and the offshore markets.
- The portfolio disclosure of the Scheme will be largely limited to the particulars of the Underlying fund and investments by the Scheme in money market instruments. Therefore, investors may not be able to obtain specific details of the Scheme.
- In addition to the recurring expenses of the Scheme, the investor shall also bear the applicable expenses of the Underlying fund. Therefore, the returns that the investor may receive shall be substantially impacted or may, at times, be lower than the returns that an investor, directly investing in the Underlying fund could obtain.

(b) Risk factors of the Underlying fund

- The performance of the Underlying fund will be affected by a number of risk factors, including the following, which have also been disclosed by the Underlying fund in its prospectus filed with the appropriate regulatory authorities:

- (i) **Political, Economic and Social Risks** – All financial markets may at times be adversely affected by changes in political, economic and social conditions. Economic and / or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal / fiscal / regulatory / market reforms.
- (ii) **Market Risk** – The Underlying fund's investments are subject to the risks inherent in all investments in Securities i.e. the value of holdings may fall as well as rise. As the Underlying fund invests primarily in equities, investors are exposed to stock market fluctuations and the financial performance of the companies held in the Underlying fund's portfolio. In addition, the Underlying fund may be subject to investment holding limits imposed on investors by the markets in which the Underlying fund invests.
- (iii) **Currency Risk** – The assets in which the Underlying fund is invested and the income from the assets will or may be quoted in currencies which are different from the Underlying fund's base currency. The performance of the Underlying fund will therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Underlying funds' base currency and hence there can be the prospect of additional loss or the prospect of additional gain to the investors greater than the usual risks of investment. The performance of the Underlying fund may also be affected by changes in exchange control regulations.
- (iv) **Hedging Risk** – The investment manager to the Underlying fund is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.
- (v) **Diversification Risk** – Although the portfolio is well diversified in terms of the number of holdings, investors should be aware that the Underlying fund is likely to be more volatile than a broad-based fund, such as a global equity fund, as it is more susceptible to fluctuations in value resulting from adverse conditions in the region in which it invests.
- (vi) **ASEAN and Emerging Markets Risk** – Accounting, auditing and financial reporting standards in some of the markets in which some of the Underlying fund's assets may be invested may be less rigorous than international standards. As a result, certain material disclosures may not be made.

Investment in ASEAN and emerging markets involves special considerations and risks. Many ASEAN and emerging market countries are still in the early stages of modern development and are subject to abrupt and unexpected changes. In many cases, governments retain a high degree of direct control over the economy and may take actions having sudden and widespread effects. There is a possibility of nationalisation, expropriation or confiscatory taxation, foreign exchange control, political changes, government regulation, social instability or diplomatic developments which could affect adversely the economies of ASEAN and emerging markets or the value of the Underlying fund's investments, and the risks of investing in countries with smaller capital markets, such as limited liquidity, price volatility, restrictions on foreign investment and repatriation of capital, and the risks associated with ASEAN and emerging economies,

including high inflation and interest rates and political and social uncertainties. Investors should be aware that the investments of the Underlying fund being primarily invested in the ASEAN countries or companies that derive the predominant part of their economic activity from ASEAN countries / emerging markets, even if listed elsewhere, its stocks can be negatively impacted by low liquidity, poor transparency and greater financial risks. However, the volatility of the Underlying fund is limited by its diversification across a large number of companies and industry groups.

Investments in products relating to ASEAN markets may also become illiquid which may constrain the ability of the investment manager to the Underlying fund to realize some or the entire portfolio.

- (vii) **Legal, Tax and Regulatory Risk** – Legal, tax and regulatory changes could occur during the term of the Underlying fund which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Underlying fund and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Underlying fund and the investors. Tax law and practice in certain countries into which the Underlying fund invests or may invest in the future is not clearly established. It is therefore possible that the current interpretation of the law or understanding of practice might change, or that the new law might be changed with retrospective effect. Legislation could be imposed retrospectively (as a result the Underlying fund could become subject to additional taxation that was not contemplated either when investments were made, valued or disposed of) or may be issued in the form of internal regulations not generally available to the public.

(viii) **Settlement Risks**

- The securities markets in some countries lack the liquidity, efficiency and regulatory and supervisory controls of more developed markets.
- Lack of liquidity may adversely affect the ease of disposal of assets. The absence of reliable pricing information in a particular security held by the Underlying fund may make it difficult to assess reliably the market value of assets.
- The share register of companies in which the Underlying fund invests in may not be properly maintained and the ownership or interest may not be (or remain) fully protected.
- Registration of Securities may be subject to delay and during the period of delay it may be difficult to prove beneficial ownership of the Securities.
- The provision for custody of assets may be less developed than in other more mature markets and thus provides an additional level of risk for the Underlying fund.

Settlement procedures may be less developed and still be in physical as well as in dematerialised form.

- (ix) **Derivatives Risk** – The Underlying fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide

disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of the Underlying fund to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager of the Underlying fund involve uncertainty and decision of the investment manager of the Underlying fund may not always be profitable. No assurance can be given that the investment manager of the Underlying fund will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in Securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in losses that significantly exceed a Mutual Fund's original investment. Certain derivatives may give rise to a form of leverage. As a result, the Underlying fund may be more volatile than if the Underlying fund had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Underlying fund's portfolio Securities.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to the Underlying fund and the cost of such strategies may reduce the Underlying fund's returns and increase the Underlying fund's potential for loss.

The Underlying fund may use derivatives to hedge market and currency risk, and for the purposes of portfolio balancing. The use of derivatives may expose the Underlying fund to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.

- (x) **Investing in Equities** – Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Underlying fund may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) under certain circumstances. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Underlying fund to make intended Securities purchases, due to settlement problems, could cause the Underlying fund to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Underlying fund's portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Underlying fund's portfolio.

The liquidity and valuation of the Underlying fund's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for disinvestment.

| Risk and Description specific to Equities | Risk Mitigants / Management Strategy of the Underlying fund |
|--|--|
| Quality risk Risk of investing in unsustainable / weak companies | <p>The stock selection process is an important part of the idea generation stage, as it provides the greater part of added value to the investments. Underpinning the stock selection process is the rigorous research conducted by dedicated country specialists. The approach to stock selection is largely country specific, which means that these investment professionals have the responsibility to design and refine their stock selection process to cope with the dynamic local factors and market conditions.</p> <p>Quality analysis based investment approach:</p> <ul style="list-style-type: none"> (i) Management (ii) Capital structure (iii) Sustainability of competitive advantage (iv) Return on equity (v) Industry attractiveness <p>In general, there are three primary sources of investment return which the investment professionals normally focus on and they form the basic premise of the stock selection process:</p> <ul style="list-style-type: none"> (i) Growth – companies that exhibit sustainable earnings growth in excess of the market through an economic cycle; (ii) Valuations – quantitative analysis in evaluating the value and profitability of the company; (iii) IDCW yield – an additional source of return, over and above capital appreciation. |
| Price Risk Risk of overpaying for a company | <p>During company visits, qualitative assessments of the relative growth prospects of the companies concerned are made and strategies are decided to create shareholder value. Industries in which companies operate are analysed along with the competitive landscape as well as the management strategy to enhance competitive advantage and returns. As part of the process, meetings are organised not only with companies that fall within the core stock coverage, but also with their competitors, distributors, suppliers and other stakeholders in order to obtain a complete picture of the industry / company and other investment opportunities. In the process, a clear understanding of the business is arrived at, enabling the identification of future long-term winners at an early stage.</p> |
| Concentration Risk | <p>Portfolio construction is the responsibility of the investment manager assigned to the Underlying fund.</p> <p>There are three objectives to the portfolio construction process:</p> <ul style="list-style-type: none"> (i) to capture and preserve value from all the best ideas by country specialists; (ii) to ensure no single decision will derail performance; and (iii) to deliver in line with the Underlying fund's risk / return profiles. <p>Portfolios are constructed using a disciplined and tailored approach, and there is a high degree of commonality across accounts with similar objectives and profiles. During the process, the investment manager assigns a target percentage weight based upon variations, positive or negative, from the predetermined benchmark weight. These variations are known as active money positions and can be easily accessed on the internal front office system which contains information on both the Underlying fund and its respective benchmark index. Investment managers may also incorporate their own views on individual stocks and exercise discretion to align with the above guidelines with the objective that is likely to be achieved by inclusion of the stock in a fund portfolio. The investment manager will also reconcile any other anomalies between the stock rankings and portfolio requirements with the overall objective of adding value to the Underlying fund portfolio.</p> <p>A dedicated team oversees investment managers to ensure compliance with the Underlying fund's internal requirements. The buy / sell decisions generated at the portfolio construction stage of the process are automatically checked against fund guidelines, and electronically forwarded to the trading team for execution.</p> |
| Liquidity Risk High impact costs | <p>Dealing in volatile, often illiquid markets imposes a cost on an active investment manager. The responsibility for minimizing the performance drag lies with the Central Dealing team whose focus is to minimize market impact and transaction costs. The competitive advantages in achieving this objective are:</p> <ul style="list-style-type: none"> I. A specialist experienced team. II. State of the art systems and on-going investment in trading technology. III. Analysis of historical transactions and associated impact costs used to determine trading strategies. IV. Low commission rates paid to brokers, reducing direct costs per trade. V. Significant overall commission payout ensuring premium service from investment banks and brokerage firms. |

| Risk and Description specific to Equities | Risk Mitigants / Management Strategy of the Underlying fund |

| | The dealing team's success can be measured by comparing each execution to the Volume Weighted Average Price (VWAP) and on-line through the independent Best Execution Comparison Service (BECS) which compares transaction costs with those of the competition. Effectiveness of the dealing team is measured on an ongoing basis. |
| Volatility Price volatility due to company or portfolio specific factors | As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods as explained above. |
| Event Risk Price volatility due to company or portfolio specific events | As explained above, the volatility arising out of portfolio specific factors are being mitigated using a combination of various methods as explained above. |

For additional risk factors of the Underlying fund, i.e. JPMorgan Funds - ASEAN Equity Fund, investors are requested to refer to the offering document of Underlying fund. The same can be viewed at www.jpmorganassetmanagement.lu

(xi) Other risks associated to the Underlying fund:

- The Underlying fund invests primarily in a portfolio of ASEAN equities. Therefore, investors may see the value of their investment fall as well as rise on a daily basis, and they may get back less than they originally invested.
 - Investors should be aware that the Underlying fund may invest in smaller companies, which can be less liquid and tend to carry greater financial risk; volatility may be higher than in a broadly based investment. However, there may also be greater potential for higher returns.
 - Also, investors should be aware that the Underlying fund is invested in emerging markets, which may be subject to additional political and economic risks, while stocks can be negatively impacted by low liquidity, poor transparency and greater financial risks.
- The Underlying fund is denominated in USD but has significant non-USD exposure.

(c) Risks associated with investing in foreign Securities and overseas mutual fund units

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme will be investing in the overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, restrictions on repatriation of capital due to exchange controls and the political environment. Further the repatriation of capital to India may also be hampered by changes in the SEBI Regulations or political circumstances.
- In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of overseas financial assets and the prevalent tax laws of the respective jurisdictions for the execution of trades or otherwise.
- Subject to the other terms of this SID, all applicants applying for up to 50000 Units (Fifty Thousand units only) shall be given their full allotment. However, keeping in mind the investment restrictions in foreign Securities currently applicable to mutual funds vide SEBI's Circulars SEBI/IMD/CIR No. 7/104753/07 dated September 26, 2007, SEBI/IMD/CIR No.2/1222577/08 dated April 8, 2008 and SEBI/HO/IMD/DF3/CIR/P/2020/225 dated

November 5, 2020, if the overall limit for the Mutual Fund in overseas investments of up to USD 600 million has been reached, applicants will receive a pro-rata allotment as calculated by the AMC. In such an event, applicant's money relating to the unused portion of the investor's original allotment request may be refunded to investors. The arrangement is subject to SEBI Regulations and approvals.

The process for monitoring the USD 1 billion limit for overseas investments shall be as follows:

- The cap of USD 1 billion will be monitored and enforced at the Mutual Fund level and not at the Scheme level.
- Once 90% of the limit is reached, investors and empaneled distributors will be informed that further sales of Units will be suspended when the Mutual Fund's combined AUM in overseas schemes reaches the cap of USD 1 billion. A notice will be issued to ISC offices and AMC branches and published on the website of the AMC (www.edelweissmf.com).
- Any allotments upon, or subsequent to, the USD 1 billion cap being breached will be performed on a pro-rata basis only and subject to the combined AUM level of overseas investments of the Mutual Fund being below this cap.

Example:

- i) Day T (opening AUM) - USD 970 million is the overseas AUM of the mutual fund, incoming cash flows on Day T - USD 30 million.
 - Allotment for the entire amount will occur.
- ii) Day T (opening AUM) - USD 970 million is the overseas AUM of the mutual fund, incoming cash flows on Day T - USD 60 million
 - Allotment only for USD 30 million on a pro rata basis will occur.
 - Therefore, on Day T, a notice will be sent to all ISC offices & AMC branches and published on the website of the AMC (www.edelweissmf.com) stating that further sales are suspended with immediate effect, in the event an additional overseas fund quota from SEBI has not been obtained.
 - If the cap of USD 1 billion is reached, refunds would be settled on a T+3 basis.
 - The above process will not have any impact on the redemption process.

(d) Risks Associated with investing in Money Market Instruments

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's inability to meet the interest and principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

e) Risk factors associated with Repo transactions in Corporate Debt:

- **Lending transactions:**
The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo lending transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.
- **Borrowing transactions:**
In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.

Restrictions on Redemptions:

As outlined in Section III-B - 'Restrictions on Redemptions' the Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets.

Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

In view of the above, investment in the Scheme should be regarded as long term in nature. The Scheme is, therefore, only suitable for investors who can afford the risks involved.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the

Scheme. However, if such limit is breached during the NFO of the Scheme, the Mutual Fund will endeavour to ensure that within a period of 3 (three) months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 (twenty) investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period without any Exit Load. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Please note that the investment restrictions applicable to the Scheme's participation in overseas investments will be as prescribed or varied by SEBI or by the Trustee (subject to SEBI requirements) from time to time. The SEBI Regulations pertaining to investment in ADRs / GDRs / foreign Securities and overseas ETFs by mutual funds have now been decided as follows:

The aggregate ceiling for overseas investments is USD 7 billion as per the above SEBI circulars. Within the overall limit of USD 7 billion, mutual funds can make overseas investments subject to a maximum of USD 1 billion per mutual fund. In accordance with paragraph 12.19.2 of the Master Circular for Mutual Funds dated May 19, 2023, permissible overseas investments are:

- ADRs / GDRs issued by Indian or foreign companies.
- Equity of overseas companies listed on recognized stock exchanges overseas.
- Initial and follow on public offerings for listing at recognized stock exchanges overseas.
- Foreign Debt Securities in the countries with fully convertible currencies, short term as well as long term debt instruments with

rating not below investment grade by accredited / registered credit rating agencies.

- Money market instruments rated not below investment grade.
- Repurchase agreements in the form of investment, where the counterparty is rated not below investment grade; repurchase agreements should not, however, involve any borrowing of funds by mutual funds.
- Government Securities where the countries are rated not below investment grade.
- Derivatives traded on recognized stock exchanges overseas only for hedging and efficient portfolio management.
- Short term deposits with banks overseas where the issuer is rated not below investment grade.

Limits for investment in overseas ETFs: The overall ceiling for investment in overseas ETFs that invest in Securities is USD 1 billion subject to a maximum of USD 300 million per mutual fund. Since the Scheme is a fund of funds scheme, in accordance with SEBI regulations, the restriction on the investments in mutual fund units up to 5% of net assets of the Scheme and which prohibits charging of fees shall not be applicable to investments in mutual funds in foreign countries. However, the management fees and other expenses charged by a mutual fund in foreign countries along with the management fee and recurring expenses charged to the Scheme shall not exceed the total limits on expenses as prescribed under Regulation 52(6) of the SEBI Regulations. Where the Scheme is investing only a part of the net assets in the foreign mutual fund(s), the same principle shall be applicable for that part of investment. The overseas securities markets offer new investment and portfolio diversification opportunities by enabling investments in the overseas markets. However, such investments also entail additional risks. Such investment opportunities may be pursued by the Scheme provided they are considered appropriate in terms of the overall investment objectives of the Scheme. The Scheme may then, if necessary, seek applicable permission from SEBI and RBI to invest abroad in accordance with the investment objective of the Scheme and in accordance with any guidelines issued by SEBI / RBI from time to time.

These investment restrictions shall be applicable at the time of investment and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any Schemes of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, AMC shall as soon as possible take appropriate corrective action, taking into account the interests of the Unit holders.

In addition, certain investment parameters may be adopted internally

by AMC, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / AMC may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Schemes to make its investments in the full spectrum of permitted investments for Mutual Funds to achieve its investment objective. As such all investments of the Schemes will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

iii) Investment of subscription money

The AMC shall make investments of the NFO proceeds only after the closure of the NFO period.

iv) Guidelines Governing Investments in GoI Securities

As per the SEBI Regulations and investment restriction guidelines issued by SEBI, the AMC will follow a policy wherein each decision of purchase / sale of GoI Securities shall be recorded. A weekly report relating to the portfolio of the Scheme will be reviewed by the Investment Committee of the AMC.

Investment and security selection of all kinds of debt instruments including GoI Securities, State Government Securities, and Government guaranteed debts are delegated to the fund manager of the AMC with the responsibility on the fund manager of the AMC to ensure conformity with the specified minimum credit rating standards for the purpose of managing credit risk and portfolio credit risk. All investments in GoI Securities shall be done in accordance with SEBI / RBI guidelines.

v) Below stated conditions and norms shall apply to repo in corporate debt securities, which are subject to change as may be prescribed by SEBI and/or RBI from time to time:

- (i) Any scheme shall not lend/borrow more than 10% of its net assets in repo against corporate debt securities.

- (iv) The schemes shall borrow through repo transactions in corporate debt securities only in line with the policy approved by the Board of Directors of the AMC and the Trustee Company.

In addition to the investment restrictions prescribed by SEBI Regulations, the AMC / the Trustee may also prescribe certain internal risk mitigating parameters / procedures from time to time to limit exposure of the Scheme in certain Securities, in order to overcome volatile market conditions.

The Trustee / the AMC may amend / alter the above stated Investment Restrictions from time to time (as also the provisions of the Trust Deed), to the extent required to be incorporated as per the SEBI Regulations, so as to enable the Scheme to make all investments permitted by the SEBI Regulations, in order to seek to achieve its investment objectives.

1. Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standards (CRS) requirements:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The Government of India and the US have reached an agreement in substance on the terms of an InterGovernmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014.

Edelweiss Mutual Fund ("the Fund")/ Edelweiss Asset Management Limited ("the AMC") is classified as a FFI under the FATCA provisions, in which case the Fund / AMC is required, from time to time, to

- (i) undertake necessary due diligence process by collecting information/documentary evidence of the US/non US status of the investors;
- (ii) disclose/report information as far as may be legally permitted about the holdings/ investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and
- (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time. FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/ specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of onboarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Further, in accordance with the regulatory requirements relating to FATCA/CRS read along with SEBI Circular no. CIR/MIRSD/2/2015 dated August 26, 2015 and AMFI Best practices guidelines circular no. 63/2015-16 dated September 18, 2015 regarding uniform implementation of FATCA/CRS requirements, investors are requested to ensure the following:

- With effect from November 1, 2015 all investors will have to mandatorily provide the details and declaration pertaining to FATCA/CRS for all new accounts opened, failing which the application shall be liable to be rejected. SEBI vide its circulars MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 had laid down a uniform KYC compliance procedure for all investors with effect from January 1, 2012. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations for In-Person Verification ("IPV").

1. Requirement for the existing investors in mutual funds:

The existing investors in mutual funds who have already complied with the KYC requirement (defined for the purpose of this SID as KYC compliant) and have the KYC compliance letter issued to them by CDSL Ventures Limited are exempt from following the new KYC procedure effective January 01, 2012, but only for the purpose of making investments with any SEBI registered mutual fund.

If, however, the KYC compliant investors would like to deal with any SEBI registered intermediary other than mutual funds, they may have to follow the new KYC compliance procedure.

2. Requirement for the new investors in mutual funds:

All investors other than KYC compliant investors as defined above are required to follow the new KYC compliance procedure as mentioned below while making any investment in the Scheme:

- Fill up and sign the KYC application form (for individual investors or non-individual investors as appropriate) available on the AMC's website i.e. www.edelweissmf.com or www.amfiindia.com or www.cvlindia.com
- At the time of transacting with the Mutual Fund, submit, in person, the completed KYC application form along with all the necessary documents as mentioned in the KYC application form with any of the offices of the distributors (qualified as per the following note), Registrar and Transfer Agent of the Mutual Fund and the Mutual Fund; and

Note: As per the SEBI circular MIRSD/Cir-26/2011 dated December 23, 2011, it is mandatory for SEBI registered intermediaries to carry out IPV of any investor dealing with a SEBI registered intermediary.

For investments in a mutual fund, the asset management companies, registrar and transfer agents of mutual funds and distributors which comply with the certification process of National Institute of Securities Market or Association of Mutual Funds in India and have undergone the process of "Know Your Distributors" are authorised to carry out the IPV. Unless the IPV process is completed, the investor will not be considered as KYC compliant under the KYC compliance procedure and hence will not be permitted to make any investment in the Scheme.

For investors proposing to invest in the Mutual Fund directly (i.e. without being invested through any distributor), IPV done by a scheduled commercial bank may be relied upon by the Mutual Fund. Once all the documents are verified by a KYC Registered Agency, they will send the investor a letter within 10 (ten) Business days from the date of receipt of necessary documents by them from the Mutual Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("final acknowledgement") or any deficiency in submission of details or documents.

On the basis of the temporary acknowledgement or the final acknowledgement the investor would be eligible to deal with any of the SEBI registered intermediaries as mentioned in the above mentioned SEBI Circulars.

In order to protect investors from fraudulent encashment of cheques, the SEBI Regulations require that cheques for Redemption of Units specify the name of the Unit Holder and the bank name and account number where payments are to be credited. Hence, all applicants for Purchase of Units / Redemption of Units must provide a bank name, bank account number, branch address, and account type in the Application Form

| Ongoing Price for Subscription (Purchase) / Switch-in (from other Schemes of Edelweiss Mutual Fund) by Investors This is the price you need to pay for Purchase / switch-in. | <p>Sales Price:</p> <p>For calculating the Sales price, the entry load applicable at the time of investment shall be deducted from the applicable NAV of the Scheme. Please note that as per SEBI (Mutual Funds) Regulations 1996, no entry load can be charged to the Scheme. For example: If the applicable NAV of the Scheme is ₹ 10 and the Entry Load applicable is 0% at the time of investment, then the Sales Price will be calculated as follows:</p> <p>Step 1:</p> $\text{Entry Load Amount} = \text{Applicable NAV} * \text{Entry Load at the time of investment in \%}$ $= ₹ 10 * 0\%$ $= ₹ 0$ <p>Step 2 :</p> $\text{Sales price} = \text{Applicable NAV} - \text{Entry Load Amount}$ $= ₹ 10 - ₹ 0$ $= ₹ 10$ |

Ongoing Price for Redemption / Switch outs (to other schemes of Edelweiss Mutual Fund) by Investors

This is the price you will receive for Redemptions / Switch-outs.

*Example: If the applicable NAV is ₹ 10, exit load is 2% then Redemption Price will be: ₹ 10 * (1-0.02) = ₹ 9.80*

Repurchase Price:

For calculating the Repurchase Price, the exit load applicable at the time of investment shall be deducted from the applicable NAV of the Scheme. For example: If the applicable NAV of the Scheme is ₹ 10 and the Exit Load applicable at the time of investment is 1% if redeemed before completion of 1 year from the date of allotment of units and the investor redeems units before completion of 1 year, then Repurchase Price will be calculated as follows:

Step 1:

$$\begin{aligned}\text{Exit Load Amount} &= \text{Applicable NAV} * \text{Exit Load at the time of investment in \%} \\ &= ₹ 10 * 1\% \\ &= ₹ 0.01\end{aligned}$$

Step 2 :

$$\begin{aligned}\text{Repurchase price} &= \text{Applicable NAV} - \text{Exit Load Amount} \\ &= ₹ 10 - ₹ 0.01 \\ &= ₹ 9.90\end{aligned}$$
