### I. INTRODUCTION

### A. RISK FACTORS

### Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your
  investment in the Scheme may go up or down depending on the various factors and forces affecting the
  capital markets and money markets.
- Past performance of the Sponsor and its associates/AMC/Mutual Fund does not guarantee future performance of the Scheme of the Mutual Fund.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

### ■ Scheme Specific Risk Factors:

The Scheme is subject to the specific risks that may adversely affect the Scheme's NAV, return and/or ability to meet its investment objective.

The specific risk factors related to the Scheme include, but are not limited to the following.

### (i) Risk Factors associated with Exchange Traded Schemes:

### a) Passive Investments:

- As the Scheme proposes to invest not less than 95% of the net assets in the securities of the
  Underlying Index in the same proportion, the Scheme will not be actively managed. The Scheme
  may be affected by a general decline in the Indian markets relating to its Underlying Index. The
  Scheme invests in the securities included in its Underlying Index regardless of their investment
  merit. The AMC does not attempt to individually select stocks or to take defensive positions in
  declining markets.
- Performance of the Underlying Index will have a direct bearing on the performance of the Scheme. In the event the Underlying Index, is dissolved or is withdrawn or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Scheme so as to track a different and suitable index or to suspend tracking the Underlying Index till such time it is not published and appropriate intimation will be sent to the Unit holders of the Scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to tracking error during the intervening period.
- S&P BSE 500 Index ("Underlying Index") represents top 500 companies wherein HDFC Asset Management Company Limited ("HDFC AMC") is one of the representative company. As on September 30, 2023, the index weightage of HDFC AMC is 0.19%. The companies forming part of the Underlying Index need to satisfy the eligibility criteria as provided by the index provider. The overall index governance is independently managed by the index provider and HDFC AMC and/or

its Sponsor/Trustee Company have no control or influence in any manner whatsoever in this regard. In other words, there is no scope for the Fund Manager of the Scheme for any exercise of discretion on whether to buy, hold or sell a security i.e. the discretion on the composition of any of the representative companies in the Underlying Index as exercised by the index provider would have to be obeyed and mapped in managing the portfolio of the Scheme.

Further, it is pertinent to note that there is no element of research recommendations involved before the execution of trades in the Scheme. The decision of the Fund Manager to execute trades including rebalancing required will be purely driven by the inflows and outflows in the Scheme and composition of the Underlying Index.

### b) Tracking Error Risk/ Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the Underlying Index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance, changes to the Underlying Index and regulatory policies which may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error" is defined as the standard deviation of the difference in daily returns between the Scheme and the Underlying Index annualized over 1 year period. Tracking difference is the difference of returns between the Scheme and the index annualized over 1 year, 3 year, 5 year, 10 year and since the scheme inception period. Tracking Error may arise including but not limited to the following reasons.

- a. Expenditure incurred by the Scheme.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The Scheme may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- e. Rounding off of quantity of shares in Underlying Index.
- f. Dividend received from underlying securities.
- g. Disinvestments by Scheme to meet redemptions, recurring expenses, etc.
- h. Execution of large buy/sell orders.
- Transaction cost (including taxes and insurance premium), recurring expenses and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
- j. Realisation of Unit holders' funds.
- k. The Scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.
- I. The Index reflects the prices of securities at a point in time, which is the price at close of business day on BSE/National Stock Exchange of India Limited (NSE). The Scheme, however, may at times trade these securities at different points in time during the trading session and therefore the prices at which the Plan trade may not be identical to the closing price of each scrip on that day on the

BSE/NSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE/NSE closing prices.

m. In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market.

It will be the endeavour of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum for daily 12 month rolling return. However, in case of corporate action events like, Dividend received from underlying securities, rights issue from underlying securities or market events like circuit filters in the securities and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

### c) Stock Liquidity in the event of Circuit Filter

Liquidity of stocks which are available only in cash segment and not in F&O segment gets adversely impacted in the event of a circuit filter imposed by any of the stock exchanges. This would also impact the subscription and redemption of ETF units, directly done with the Fund and the same will be dealt with in the manner described below. Further, this may result in gain/loss to existing unit holders when finally the purchase/sale of that stock is executed. This would also create tracking error while comparing returns with benchmark.

Transaction type	Upper circuit	Lower circuit
	The Scheme shall buy stocks <u>as per</u> <u>basket</u> wherever no circuit.	
	In case of Circuit on any stock(s) in the basket, the Scheme shall:	
Subscription	Hold cash for stock(s) on circuit at the latest available price on the stoce exchange when the circuit was triggered	NA
	Buy the stock(s) immediately when circuit is open.	
	This may impact performance and result in tracking error.	
Dedematica	NIA	The Scheme shall sell stocks <u>as per</u> <u>basket</u> if no circuit.
Redemption	demption NA	In case of circuit on Stock(s) in the basket, the Scheme shall:

Transaction type	Upper circuit	Lower circuit
		Pay from cash or cash equivalent or create cash to pay for stocks on circuit at the latest available price on the stock exchange when the circuit was triggered by selling other stocks which may impact performance and result in tracking error;
		2. Sell stock immediately when circuit is open and re-balance portfolio which may impact performance and result in tracking error.

### d) Market Trading Risks:

- i. Absence of Prior Active Market: Although the Scheme is listed on NSE and/or BSE, there can be no assurance that an active secondary market will develop or be maintained. Hence there could be a time when trading in the Units of the Scheme would be infrequent.
- **ii.** Trading in Units may be halted: Trading in the units of the Scheme on NSE/BSE may be halted because of market conditions or for reasons that in view of NSE/BSE or SEBI, trading in the units of the Scheme is not advisable.
  - In addition, trading of the units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange(s) and SEBI 'circuit filter' rules.
  - There can be no assurance that the requirements of NSE/BSE necessary to maintain the listing of the units of the Scheme will continue to be met or will remain unchanged.
- iii. Units of the Scheme may trade at prices other than NAV: The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of the Scheme's holdings. The trading prices of the units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of the Scheme. However, given that units of the Scheme can be created and redeemed in creation units directly with the Fund, it is expected that large discounts or premiums to the NAV of units of the Scheme will not sustain due to arbitrage opportunity available.
- iv. Regulatory Risk: Any changes in trading regulations by the Stock Exchange(s)/SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- e) Redemption Risk: Investors should note that even though the Scheme is an open ended Scheme, subscription/redemptions directly with the Fund would be limited to such investors who have the ability to subscribe/redeem the units of the Scheme in Creation Unit Size (except in certain exceptional circumstances mentioned in this SID). Generally, these lot sizes are larger as compared to normal funds. Thus, even though this Scheme is open ended, due to large lot size, very few investors can directly subscribe and redeem the units of the Scheme. However, investors wishing to subscribe/redeem units in other than Creation Unit Size can do so by buying/selling the same on NSE/BSE.

f) The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the Mutual Fund depends up on the confirmations to be received from depository (ies) on which the Mutual Fund has no control.

### (ii) Risk factors associated with investing in equities and equity related instruments

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a
  larger amount of liquidity risk, in comparison to securities that are listed on the exchanges. Investment
  in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these
  investments is limited by the overall trading volume on the stock exchanges and may lead to the
  Scheme incurring losses till the security is finally sold.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

### (iii) Risk factors associated with investing in Fixed Income Securities

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default (i.e. the risk of an issuer's inability to meet interest or principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities
  before their maturity date, in periods of declining interest rates. The possibility of such prepayment
  may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields,
  resulting in lower interest income for the Scheme.
- Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- Settlement risk: Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
- The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- Risks associated with investment in unlisted securities: Except for any security of an associate
  or group company, the scheme can invest in securities which are not listed on a stock exchange
  ("unlisted Securities") which in general are subject to greater price fluctuations, less liquidity and
  greater risk than those which are traded in the open market. Unlisted securities may lack a liquid
  secondary market and there can be no assurance that the Scheme will realise their investments in
  unlisted securities at a fair value.
- Investment in unrated instruments may involve a risk of default or decline in market value higher than
  rated instruments due to adverse economic and issuer-specific developments. Such investments
  display increased price sensitivity to changing interest rates and to a deteriorating economic
  environment. The market values for unrated investments tends to be more volatile and such securities
  tend to be less liquid than rated debt securities.

### (iv)Risk factors associated with investment in Tri-Party Repo

The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the

default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

### (v) General Risk factors

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments
  made by the Scheme. Different segments of the Indian financial markets have different settlement periods
  and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt
  of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of
  various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under section Right to Restrict Redemption and / or Suspend Redemption of the units.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest
  in securities falling within its investment objective resulting in holding the monies collected by it in cash or
  cash equivalent or invest the same in other permissible securities / investments amounting to substantial
  reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or
  cash equivalents for its day-to-day liquidity requirements.
- Investment strategy to be adopted by the Scheme may carry the risk of significant variance between the portfolio allocation of the Scheme and the Benchmark particularly over a short to medium term period.
- Performance of the Scheme may be affected by political, social, and economic developments, which may
  include changes in government policies, diplomatic conditions, and taxation policies.

### (vi) Risk factors associated with investing in Derivatives

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as
  disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund
  manager to identify such opportunities. Identification and execution of the strategies to be pursued by the

fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

• The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

### Credit Risk:

The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.

### Market Risk:

Market movements may adversely affect the pricing and settlement of derivatives.

### Illiquidity risk:

This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

### (vii) Risk factors associated with Securities Lending

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

### (viii) Risk factors associated with Creation of Segregated Portfolio

In the event of creation of Segregated Portfolio in case of a Credit Event, investors' investments may be subject to following risks:

- Investor holding units of Segregated Portfolio may not able to liquidate their holding till the time of recovery of money from the issuer.
- Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee its liquidity.

There may not be active trading of units on the exchange.

Further trading price of units on the exchange may be significantly lower than the prevailing NAV.

Security comprising Segregated Portfolio may not realise any value.

### (ix) Risk factors associated with processing of transaction through Stock Exchange Mechanism

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

#### II. INFORMATION ABOUT THE SCHEME

## A. TYPE OF THE SCHEME

An open ended scheme replicating/tracking S&P BSE 500 Index

#### **B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?**

To generate returns that are commensurate (before fees and expenses) with the performance of the S&P BSE 500 Index, subject to tracking error.

There is no assurance that the investment objective of the Scheme will be realized.

#### C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, the asset allocation (% of Net Assets) of the Scheme's portfolio will be as follows:

Type of Instruments	Minimum Allocation (% of Total Assets)	Maximum Allocation (% of Total Assets)	Risk Profile
Securities covered by S&P BSE 500 Index (TRI) #	95	100	Very High
Debt Securities & Money Market Instruments, units of Debt Schemes of Mutual Funds	0	5	Low to Medium

<sup>#</sup> includes shares of HDFC Asset Management Company Limited. The S&P BSE 500 Index (TRI) is published by Asia Index Private Limited ("AIPL"), which is a joint venture among affiliates of S&P Dow Jones Indices LLC ("SPDJI") and BSE Limited ("BSE"). The HDFC S&P BSE 500 ETF will be managed passively to replicate the performance of the Underlying Index.

As per clause 12.24.1 of Master Circular, the cumulative gross exposure through equity, debt, derivative positions, repo transactions, other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the Scheme.

However, the cumulative gross exposure through equity, debt and derivative positions may exceed 100% of the net assets of the Scheme to the extent of deployment of Subscription and Redemption cash flow.

The Scheme retains the flexibility to invest in debt securities and money market instruments as permitted by SEBI/RBI from time to time and subject to obtaining regulatory approvals, if any, including schemes of mutual funds.

The Scheme does not intend to undertake/invest/engage in:

- Debt Derivatives, ADR/GDR/Foreign Securities/Securitized Debt.
- Credit Default Swaps.
- Short Selling.
- Repo in corporate debt securities.

- Debt instruments having special features viz. subordination to equity (absorbs losses before equity capital) and/or convertible to equity upon trigger of a pre-specified event for loss absorption.
- Structured obligations (SO rating) and/or credit enhanced debt (CE rating).
- Units of Real Estate Investment Trusts (REITs) and/or Infrastructure Investment Trusts (InvITs) unless received as corporate action or the instrument/security is added in the benchmark Index as a constituent.

The Scheme may invest upto 20% of its net assets in equity derivatives. Exposure to equity derivatives of the index constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions and the same will be subject to rebalancing. However, there may be a cost attached to buying futures/options. The Scheme will not maintain any leveraged or trading positions.

The Scheme may however invest in Tri-party Repo in Government Securities or treasury bills (TREPS), Reverse Repos and any other similar overnight instruments as may be provided by RBI and approved by SEBI.

Pending deployment of funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to clause 12.16 of Master Circular. The AMC shall not charge investment management and advisory fees on such investments. The Term Deposits placed as margin will be covered in exposure to cash and cash equivalent.

# Stock Lending by the Fund

Subject to the SEBI (MF) Regulations, Securities Lending Scheme, 1997 and in accordance with clause 12.11 of Master Circular, the Scheme intends to engage in Stock Lending.:

- Not more than 20% of the net assets of the Scheme can be deployed in Stock Lending.
- ii. Not more than 5% of the net assets of the Scheme can be deployed in Stock Lending to any single approved intermediary i.e. the limit will be at broker level.

Stock Lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period.

The Mutual Fund may not be able to sell such lent out securities, and this can lead to temporary illiquidity.

## **Change in Asset Allocation Pattern**

As an index linked scheme, the investment policy is primarily passive management. However, the above mentioned investment pattern is indicative and subject to the SEBI (MF) Regulations and Circulars issued thereunder, the same may vary from time to time. As per clause 1.14.1.2.b of Master Circular, the Fund Manager, may deviate from the above investment pattern for short term period on defensive considerations. The same will be rebalanced within 7 Business Days.

As per clause 3.6.7 of Master Circular:

- any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.
- in case of change in constituents of the index due to periodic review, the portfolio of the Scheme shall be rebalanced within 7 calendar days or such other timeline as may be prescribed by SEBI from time to time.

# **Tracking Error:**

The Scheme, in general, will hold all the securities that constitute the Underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2.00% p.a. (based on daily rolling returns for last 12 months). However, in case of events like, Dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above mentioned limits.

## INTRODUCTION TO EXCHANGE TRADED FUNDS (ETF)

ETFs are innovative products that provide exposure to an index or a basket of securities or physical gold that trade on the exchange like a single stock. ETFs have a number of advantages over traditional open- ended index funds as they can be bought and sold on the exchange at prices that are usually close to the actual Intra-Day NAV of the Scheme. ETFs are an innovation to traditional mutual funds as ETFs provide Investors a fund that closely tracks the performance of an index/physical gold with the ability to buy/sell on an Intra-Day basis. Unlike listed close ended funds, which trade at substantial premiums or more frequently at discounts to NAV, ETFs are structured in a manner which allows to create new Units and Redeem outstanding Units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription/redemption of units work on the concept of exchange with underlying securities. In other words, Large Investors/institutions can purchase Units by depositing the underlying securities with the Fund/AMC and can redeem by receiving the underlying shares in exchange of Units in Creation Unit Size. Units can also be bought and sold directly on the exchange.

ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the Investors in the form of lower costs. Further more, exchange traded mechanism enables minimal collection, disbursement and other processing charges. The structure of ETFs is such that it protects long-term Investors from inflows and outflows of short-term Investor. This is because the Fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the creation/redemption of units through the in-kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

ETFs are highly flexible and can be used as a tool for gaining instant exposure to the equity markets, equitising cash or for arbitraging between the cash and futures market.

## **Benefits of ETFs**

- 1. Can be easily bought/sold like any other stock on the exchange through terminals spread across the country
- 2. Can be bought/sold anytime during market hours at prices that are expected to be close to actual NAV of the Schemes. Thus, investor invests at real-time prices as opposed to end of day prices.

- 3. No separate form filling for buying/selling units. It is just a phone call to your broker or a click on the net.
- 4. Ability to put limit orders.
- 5. Minimum investment for an ETF is one unit.
- 6. Protects long-term investors from the inflows and outflows of short-term investors.
- 7. Flexible as it can be used as a tool for gaining instant exposure to the respective equity/gold markets, equitizing cash, hedging or for arbitraging between the cash and futures market.
- 8. Helps in increasing liquidity of underlying cash market.
- 9. Aids low cost arbitrage between futures and cash market.
- 10. An investor can get a consolidated view of his investments without adding too many different account statements as the Units issued would be in demat form.

## **Uses of ETFs**

- 1. Investors with a long-term horizon: Allows diversification of portfolio at one shot thereby reducing scrip specific risk at a low cost.
- 2. Institutions and Mutual Funds: Allows easy asset allocation, hedging and equitising cash at a low cost.
- 3. Arbitrageurs: Low impact cost to carry out arbitrage between the cash and the futures market.
- 4. Investors with a shorter term horizon: Allows liquidity due to ability to trade during the day and expected to have quotes near NAV during the course of trading day.

#### **Risks of ETFs**

- 1. Absence of Prior Active Market: Although the units of ETFs are listed on the Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.
- 2. Lack of Market Liquidity: Trading in units of ETFs on the Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned stock exchange or market regulator, trading in the ETF units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit filter' rules. There can be no assurance that the requirements of the concerned stock exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain unchanged.
- 3. Units of Exchange Traded Funds may trade at prices other than NAV: Units of ETFs may trade above or below their NAV. The NAV of units of ETFs may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created/redeemed in creation units, directly with the Fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

Each Creation Unit Size consists of 415,000 units of the ETF. Each unit of the ETF will be approximately equal to the 1/1000th value of the S&P BSE 500 Index (TRI).

'Portfolio Deposit' consists of pre-defined basket of securities that represent the Underlying Index as announced by AMC from time to time.

- Procedure for Redemption directly with the Mutual Fund in Creation Unit Size for Market Makers/Large Investors
- The requisite number of Units of the Scheme equivalent to the Creation Unit has to be transferred to the Fund's Depository Participant account and the Cash Component to be paid to the AMC/Custodian.

- 2. Transaction handling charges include brokerage, Securities transaction tax, regulatory charges if any, depository participant charges, uploading charges and such other charges that the mutual fund may have to incur in the course of Cash subscription/redemption or accepting the Portfolio Deposit or for giving a portfolio of securities as consideration for a redemption request. Such transaction handling charges shall be recoverable from the transacting Investor.
- 3. The Portfolio Deposit and/or Cash Component for the ETF may change from time to time due to change in NAV.
- 4. The Fund may from time to time change the size of the Creation Unit in order to equate it with marketable lots of the underlying securities.

Type of investor and transaction Details	Sale of units by Mutual Fund	Redemption of units by Unit holders
Market Makers/Large Investor	Any Business Day in Creation Unit* Size and in multiple thereof. Only through stock exchange(s)	Any Business Day in Creation Unit* Size and in multiple thereof. Only through stock exchange(s)

Role of Large Investor	Only an investor – no other role in the Scheme	e operations.

Each Creation Unit Size consists of 415,000 units of the ETF and 1 unit of the ETF will be approximately equal to the 1/1000th value of the S&P BSE 500 Index (TRI).

Procedure for Redemption directly with the Mutual Fund during Liquidity Window.

When the Scheme announces Liquidity Window on its website, (refer para "Liquidity/Redemption of units directly with the Mutual Fund during in exceptional circumstances (Liquidity Window)" under Section titled "Highlights", Investors may tender their redemption request to their Depositories Participants for redemption at Applicable NAV, for transactions upto Rs 25 Crores. Redemptions up to 3.00 p.m. on any Business Day, shall be processed by the Fund at the closing NAV of the day and those received thereafter on that day will be processed at the closing NAV of the next Business Day. In such cases, redemption proceeds shall be credited to the bank account linked to unitholder's demat account.

#### **Market Makers:**

AMC has appointed at least two Market Makers (MMs), who are members of the Stock Exchanges or such other persons as permitted by SEBI to act as Market Makers, to provide continuous liquidity on the stock exchange where the units of ETF are listed. The Market Makers offers two-way quotes (buy and sell quotes) in the secondary market for ensuring liquidity in the ETF Units.

Further, the AMC reserves the right to modify Market Makers on an ongoing basis. The list of Market Makers will be available on the website of the Fund www.hdfcfund.com.

As permitted under clause 3.6.1.5 of Master Circular, the AMC may enable net settlement between cash leg of transactions in units of the Scheme by Market Makers and consequent transaction in underlying basket by the Scheme in accordance with the guidelines issued by SEBI/AMFI in consultation with Clearing Corporations/stock exchanges in this regard.

## D. WHERE WILL THE SCHEME INVEST?

Investments in these securities will be as per the limits specified in the asset allocation table of Scheme, subject to permissible limits laid under SEBI (MF) Regulations.

For example, the Scheme may invest in stocks not included in the relevant Underlying Index in order to reflect various corporate actions (such as mergers) and other changes in the relevant Underlying Index (such as reconstitutions, additions, deletions and these holdings will be in anticipation and in the direction of impending changes in the Underlying Index).

Pursuant to clause 12.12 of the Master Circular, the AMC may constitute committee(s) to approve proposals for investments in unrated debt instruments. The AMC Board and the Trustee shall approve the detailed parameters for such investments. The details of such investments would be communicated by the AMC to the Trustee in their periodical reports. It would also be clearly mentioned in the reports, how the parameters have been complied with. However, in case any unrated debt security does not fall under the parameters, the prior approval of Board of AMC and Trustee shall be sought. Investment in debt instruments shall generally have a low risk profile and those in money market instruments shall have an even lower risk profile. The maturity profile of debt instruments will be selected in accordance with the AMC's view regarding current market conditions, interest rate outlook and the stability of ratings.

Investments in Debt and Money Market Instruments will be as per the limits specified in the asset allocation table as mentioned, subject to restrictions/limits laid under SEBI (MF) Regulations mentioned under section 'WHAT ARE THE INVESTMENT RESTRICTIONS?'.

Investments in debt will be made through primary or secondary market purchases, other public offers, placements and right offers (including renunciation). The securities could be listed, unlisted (as permitted), privately placed, secured/unsecured, rated/unrated.

- Where the monies are parked in short term deposits of Scheduled Commercial Banks pending deployment, the Scheme shall abide by the following guidelines as per clause 12.16 of the Master Circular:
  - 1) "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
  - 2) Such short-term deposits shall be held in the name of the Scheme.

- 6) The Scheme shall not park funds in short- term deposit of a bank, which has invested in the Scheme. Trustees/AMC shall also take steps to ensure that a bank in which the Scheme has short term deposit does not invest in the Scheme until the Scheme has short term deposit with such bank.
- 7) No investment management and advisory fees will be charged for such investments in the Scheme. The aforesaid limits shall not be applicable to term deposits placed as margins for trading in cash and derivatives market.
- The Scheme may engage in securities lending within the overall framework of 'Securities Lending Scheme, 1997 specified by SEBI and such other norms as may be specified by SEBI from time to time.
- The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual funds, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing SEBI (MF) Regulations. As per the SEBI (MF) Regulations, no investment management fees will be charged for such investments and the aggregate inter scheme investment made by all the schemes of HDFC Mutual Fund or in the schemes of other mutual funds shall not exceed 5% of the net asset value of the HDFC Mutual Fund.

# • Trading in Derivatives:

The Scheme may take derivatives position based on the opportunities available subject to the guidelines provided by SEBI from time to time and in line with the overall investment objective of the Scheme. The Fund has to comply with the prescribed disclosure requirements.

The Scheme intends to use derivatives mainly for the purpose of hedging and portfolio balancing. Losses may arise as a result of using derivatives, but these are likely to be compensated by the gains on the underlying cash instruments held by the Scheme. The Scheme will not assume any leveraged exposure to derivatives.

Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment. The Scheme intends to take position in derivative instruments like Futures, Options, and such other derivative instruments as may be permitted by SEBI from time to time.

Pursuant to clause 7.5.1.2 of Master Circular, the Scheme(s) shall be treated as Trading Members at par with a registered FII in respect of position limits in index futures, index options, stock options and stock futures contracts.

Derivatives can be traded over the exchange or can be structured between two counter-parties. Those transacted over the exchange are called exchange Traded derivatives whereas the other category is referred to as OTC (Over the Counter) derivatives. Some of the differences of these two derivative categories are as under:

**Exchange traded derivatives:** These are quoted on the exchanges like any other traded asset class. The most common amongst these are the Index Futures, Index Options, Stock Futures and Options on individual equities/securities. The basic form of the futures contract is similar to that of the forward contract, a futures contract obligates its owner to purchase a specified asset at a specified exercise price on the contract maturity date. Futures are cash-settled and are traded only in organised exchanges. Exchange traded derivatives are standardised in terms of amount and delivery date. Standardisation and transparency generally ensures a liquid market together with narrower spreads. On the other hand, for

delivery dates far in the future, there may be insufficient liquidity in the futures market whereas an OTC price may be available.

**OTC derivatives:** OTC derivatives require the two parties engaging in a derivatives transaction to come together through a process of negotiation. It is a derivative that is customised in terms of structure, amount, tenor, underlying assets, collateral etc. Some of the common examples are interest rate and currency swaps, Forward Rate Agreements (FRAs) etc.

**Position Limits:** The position limits for trading in derivatives by Mutual Funds specified by clause 7.5 of the Master Circular are as follows:

# i. Position limit for Mutual Funds in index options contracts

- a) The Mutual Fund position limit in all index options contracts on a particular Underlying Index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock exchange.
- b) This limit would be applicable on open positions in all options contracts on a particular Underlying Index.

### ii. Position limit for Mutual Funds in index futures contracts

- a) The Mutual Fund position limit in all index futures contracts on a particular Underlying Index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock exchange.
- b) This limit would be applicable on open positions in all futures contracts on a particular underlying.

## iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:

- 1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
- 2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

## iv. Position limit for Mutual Funds for stock based derivative contracts

The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts will be as follows:-

- The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).

#### v. Position limit for each Scheme of a Mutual Fund.

The Scheme-wise position limit requirements shall be:

- 1) For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a Scheme of a mutual fund shall not exceed the higher of:
  - 1% of the free float market capitalization (in terms of number of shares). or

- 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
- 2) This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock exchange.
- 3) For index based contracts, Mutual Funds shall disclose the total open interest held by its Scheme or all Schemes put together in a particular Underlying Index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that Underlying Index.

**Exposure Limits:** The exposure limits for trading in derivatives by Mutual Funds specified by clause 12.25 of the Master Circular are as follows:

- 1. The cumulative gross exposure through equity, debt, derivative positions, other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the scheme.
- 2. Mutual Funds shall not write options or purchase instruments with em-bedded written options except as permitted under SEBI circulars from time to time. Currently Mutual Fund schemes (except Index Funds and ETFs) may write call options only under a covered call strategy.
- 3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
- 4. Cash or cash equivalents i.e. Government Securities, T-Bills and Repo on Government Securities with residual maturity of less than 91 days may be treated as not creating any exposure.
- 5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
  - a) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
  - b) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
  - c) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
  - d) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- 6. (a) Mutual Funds may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.
  - (b) In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.

- 7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1
- 8. Definition of Exposure in case of Derivative Positions: Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows.

Position	Exposure	
Long Future	Futures Price * Lot Size * Number of Contracts	
Short Future	Futures Price * Lot Size * Number of Contracts	
Option Bought	Option Premium Paid * Lot Size * Number of Contracts	

# E. WHAT ARE THE INVESTMENT STRATEGIES? INVESTMENT STRATEGY AND RISK CONTROL:

HDFC S&P BSE 500 ETF will invest in stocks comprising the Underlying Index and endeavor to track the benchmark index. The Scheme may also invest in debt & money market instruments, in compliance with regulations to meet liquidity and expense requirements. HDFC S&P BSE 500 ETF endeavors to invest in stocks forming part of the Underlying Index in the same ratio as per the index to the extent possible and to that extent follows a passive investment strategy, except to the extent of meeting liquidity and expense requirements.

Since the Scheme is an exchange traded fund, it will only invest in securities constituting the Underlying Index. However, due to corporate action in companies comprising the index, the Scheme may be allocated/allotted securities which are not part of the index. Such holdings would be rebalanced within 7 Business Days from the date of allotment/listing of such securities. As part of the Fund Management process, the Scheme may use derivative instruments such as futures and options, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations. However, trading in derivatives by the Scheme shall be for restricted purposes as permitted by the regulations.

Though every endeavour will be made to achieve the objective of the Scheme, the AMC/Sponsor/Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

**RISK CONTROL:** The Scheme aims to track the S&P BSE 500 Index (TRI) before expenses. The index will be tracked on a regular basis and changes to the constituents or their weights, if any, will be replicated in the underlying portfolio with the purpose of minimizing tracking errors.

The Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio would follow the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking errors. Thus there would be no additional element of volatility or stock concentration on account of fund manager decisions. The fund manager would endeavor to keep cash levels at the minimal to control tracking errors.

The Risk Mitigation strategy revolves around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental inflows into/redemptions from the Scheme.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

# Strategies for Investment in Derivatives:

## **Basic Structure of an Index Future:**

Index Futures are instruments designed to give exposure to the equity market indices. BSE Limited and the National Stock Exchange of India Limited have started trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the Underlying Index and short term interest rates.

# **Example:**

Assumptions:

1 month BSE 30 Future

Spot Index: 4900

Future Price on day 1: 4920

Fund buys 10,000 futures contracts On Date of settlement

Future price = Closing spot price = 4950

Profits for the Fund = (4950-4920)\*10000 = Rs. 300,000 + interest for the 1 month period

Please note that the above example is given for illustration purposes only.

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity) plus interest costs on funds that would otherwise be invested in stocks comprising the index. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and/or mispricing of the future at any time during the life of the contract.

The strategies below are given for illustration purposes only. Some of the strategies involving derivatives that may be used by the Investment Manager, with an aim to protect capital and enhance returns include:

#### **Strategy Number 1**

# Using Index Futures to increase percentage investment in equities

This strategy will be used for the purpose of generating returns on idle cash, pending its investment in equities. The Scheme is subject to daily flows. There may be a time lag between the inflow of funds and their deployment in stocks. If so desired, the scheme would be able to take immediate exposure to equities via index futures. The position in index futures may be reversed in a phased manner, as the funds are deployed in the equity markets.

## **Example:**

The scheme has a corpus of Rs. 50 crore and there is an inflow of Rs. 5 crore in a day. The AMC may buy index futures contracts of a value of Rs. 5 crore. Later as the money is deployed in the underlying equities, the value of the index futures contracts can be suitably reduced.

Portfolio	Event	Equity Portfolio gain/(Loss) (Rs. in crore)	Derivative gain/(Loss) (Rs. in crore)	Total Portfolio gain/(Loss) (Rs. in crore)
Rs. 50 Crore equity exposure	10% rise in equity prices	5	Nil	5
Rs. 50 Crore equity exposure + Rs. 5 Crore long position index futures	10% rise in equity prices	5	0.5	5.5
Rs. 50 Crore equity exposure	10% fall in equity prices	(5)	Nil	(5)
Rs. 50 Crore equity exposure + Rs. 5 Crore long position index futures	10% fall in equity prices	(5)	(0.5)	(5.5)

## **RISKS**

- The strategy of taking a long position in index futures increases the exposure to the market. The long
  position is positively correlated with the market. However, there is no assurance that the stocks in the
  portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly
  aligned to the movement in the index.
- The long position will have as much loss/gain as in the Underlying Index. e.g. if the index appreciates by 10%, the index future value rises by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain/loss due to the movement of the Underlying Index. This is called the basis risk.
- While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

# **Strategy Number 2**

## Downside Protection Using Stock Put

As a stock hedging strategy, the purchase of a put option on an underlying stock held would lead to a capping of the loss in value of the stock in the event of a material decline in the stock's price.

The purchase of a put option against a stock holding in the scheme gives the scheme the option of selling the stock to the writer of the put at the predetermined level of the Put Option, called the strike price. If the stock falls below this level, the downside for the scheme is protected as it has already locked into the selling price. In case of a fall in the stock's price below the strike price, the value of the Put Option appreciates, approximately corresponding to the extent of the stock's price fall below the strike price.

#### **Example:**

Let us assume 20000 shares of XYZ Limited held in the portfolio with a market value of Rs. 1000 per share (overall Rs. 2 crores). The scheme purchases put options on the stock of XYZ Limited (not exceeding its

holding of 20000 shares) with a strike price of Rs. 990 for an assumed cost (called Option Premium) of Rs.15 per share (Rs. 3 lakhs for 20000 shares).

By purchasing the above Put Option, the scheme has effectively set a floor to the realisation from the stock at Rs. 975 per share (Rs. 990 strike price less Rs. 15 Option Premium paid).

In case the stock price of the company falls below Rs. 975 per share, the gain in the price of the Put Option when added to the actual market price of the stock would bring the sale realisation per share close to Rs. 975 per share.

After purchasing the above Put Option, in case the price of the stock appreciates, remains around Rs. 1000 or declines slightly to remain above the strike price, the scheme may not avail of the option and the cost for having bought the option remains fixed at Rs. 15 per share.

In effect, a floor (in this case effectively Rs. 975) is set to the stock by buying an Option at a cost that is known (in this case Rs. 15 per share).

#### **RISKS**

- There can be no assurance that ready liquidity would exist at all points in time, for the scheme to purchase or close out a specific options contract.
- A hedging strategy using Put Options is a perfect hedge on the expiration date of the put option. On other days, there may be (temporary) imperfect correlation between the share price and the put option.

# **Strategy Number 3**

• Using Call option on Index to increase percentage investment in equities

This strategy will be used for the purpose of participating in the upside of the market.

#### **Example:**

Suppose, the Scheme has a corpus of Rs. 100 crore and the Scheme on January 31, 2021 buys upto maximum 20% of the total assets into Index call option wherein strike price of underlying benchmark index is 10,000 and the premium on each call option for expiry after 3 years i.e. February 01, 2024 was at Rs. 2,000.

Based on the above strategy the total assets of the Scheme will be as under:

Existing Scheme Net Assets		Revised Scheme Total Assets	
Asset Type	Rs.	Asset Type Rs	
	(in		(in
	crores)		crores)
Equity	70	Equity	70
Net Current Assets	30	Option Premium*	
		(20% of 100 crores)	
		Net Current Assets	10
Total Assets	100	Total Assets	100

<sup>\*</sup>Option premium paid is to take an additional exposure of around Rs. 100 crores of equities. Therefore, the total exposure to equity assets due to the said strategy will be around Rs. 170 crores (i.e. Rs. 70 crores + Rs. 100 crores).

Assuming the market index goes up the value of call option will increase. Thus, one can participate in the upside of the market as shown in the table below.

Date	Closing value of underlying benchmark index	Call Premium/value at expiry (Rs.)
31/01/2021	10,000	2,000
February 01, 2024	12,400	2,400

Thus, the gain on the above strategy for the Scheme will be Rs. 400 (Rs. 2,400 - Rs. 2,000) on each call option.

#### **RISKS**

- The strategy of taking a long position in index call option increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.
- The risk/downside, if the market falls/remains flat is only limited to the option premium paid.
- The long position will have as much loss/gain as in the Underlying Index. For e.g. if the index appreciates by 10%, the index options value rises by 10%. However, this is true only for options held till maturity.
- While option markets are typically less liquid than the underlying cash market, hence there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific contract.

# **Strategy Number 4**

# Using Put option on Index to minimize downside in equities

This strategy will be used for the purpose of hedging against downside in the market and capping the maximum loss in such a scenario.

## **Example:**

Suppose, the Scheme has a corpus of Rs 100 crore and the Scheme on January 31, 2021 buys 6% of the total assets into At-the-money Index put option wherein strike price of underlying benchmark index having expiry February 01, 2023 index put option is Rs 10,000, bought at a premium of Rs. 600.

Based on the above strategy the total assets of the Scheme will be as under:

Existing Scheme Net Assets		Revised Scheme Total Assets	
Asset Type	Rs.	Asset Type Rs.	
	(in		(in
	crores)		crores)
Equity	100	Equity	94
		Option Premium*	6
Total Assets	100	Total Assets	100

\*Option premium paid is to take downside exposure to Rs. 94 crore in underlying benchmark index. Therefore, the total exposure to long equities is Rs 94 crore and participation in downside of underlying benchmark index is Rs 94 crore through the option.

Date	Closing value of underlying benchmark index	Put Premium/value at expiry (Rs.)	
January 31, 2021	10,000	600	
February 01, 2023	9,000	1,000	

Thus, the overall gain on the above put option for the Scheme will be Rs 400 (Rs. 1,000 - Rs. 600) on each put option.

## **RISKS**

- The strategy of taking a long position in index put option hedges a portfolio of long only stocks/funds against potential markets falls. The long position in the put option is negatively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.
- The risk/downside, if the index remains above the strike price is only limited to the option premium paid. The premium paid is the maximum downside to the portfolio. There is positive return in the put strategy only if the index falls below the strike price.
- The long position will have as much loss/gain as the reverse of the Underlying Index. For e.g. if the index depreciates by 10%, the index options value rises by 10%. However, this is true only for options held till maturity.
- While option markets are typically less liquid than the underlying cash market, there can be no assurance
  that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific
  contract.

#### **PORTFOLIO TURNOVER**

Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.

This Fund will follow a passive investment strategy, the endeavour will be to minimise portfolio turnover subject to the exigencies and needs of the Scheme. Generally, turnover will be confined to rebalancing of portfolio on account of new subscriptions, redemptions and change in the composition of the Underlying Index and corporate actions of securities included in the Underlying Index.

# **INVESTMENT DECISIONS**

The Investment Committee comprising Head-Equities, Head-Fixed Income, Fund Manager(s) - Equities (for equity related matters), Fund Manager(s) - Debt (for debt related matters) Fund Manager(s) - Commodities (for Commodity related matters) and Chief Compliance Officer will inter alia lay down the fund's investment philosophy, policy and processes/procedures, review the performance/portfolios of the Schemes, monitor the credit ratings of debt exposures, etc. Fund Manager(s) shall be responsible for taking investment/divestment decisions for their respective Scheme and for adhering to the Fund's investment philosophy, policy and processes/procedures. Investment decisions shall be recorded by the respective Fund Manager(s) along with

reasons for the same. Research reports, both internal and external, covering inter alia factors like business outlook, financial analysis, valuation, etc. shall assist the Fund Manager(s) in the decision making. Credit exposure limits shall be set and reviewed by the Head-Fixed Income and Fund Manager(s) - Debt.

Head-Equities, Head-Fixed Income and the Investment Committee report to the Managing Director & CEO. Investment decisions are taken by the fund manager(s) of the respective scheme(s) and the Managing Director & CEO does not play any role in the day-to-day investment decisions. The Managing Director & CEO of the AMC shall ensure that the investments made by the fund managers are in the interest of the Unit holders.

Periodic presentations will be made to the Board of Directors of the AMC and Trustee Company to review the performance of the Scheme.

# INVESTMENT BY THE AMC IN THE SCHEME

The AMC may invest in the Scheme during the continuous offer period subject to the SEBI (MF) Regulations. The AMC may also invest in existing Schemes of the Mutual Fund. As per the existing SEBI (MF) Regulations and circulars issued thereunder, the AMC will not charge Investment Management and Advisory fee on the investment made by it in the Scheme or other existing Schemes of the Mutual Fund.

#### F. CREATION OF SEGREGATED PORTFOLIO:

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI vide its clause 4.4 of Master Circular has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes. Creation of Segregated Portfolio shall be optional and at the sole discretion of the asset management company.

The salient features of creation of Segregated Portfolio are as follows:

The term 'Segregated Portfolio' shall mean a portfolio, comprising debt or money market instrument affected by a Credit Event, that has been segregated in the scheme optionally and at the sole discretion of the AMC.

The term 'Main Portfolio' shall mean the scheme portfolio excluding the Segregated Portfolio.

The term 'Total Portfolio' shall mean the scheme portfolio including the securities affected by the Credit Event.

The term "Credit Event" with respect to creation of a Segregated Portfolio, if any, refers to:

- Issuer level downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA) as under:
  - a. Downgrade of a debt or money market instrument to 'below investment grade',
  - b. Subsequent downgrades of the said instruments from 'below investment grade', or
  - c. Similar such downgrades of a loan rating; or
  - d. Any other scenario as permitted by SEBI from time to time.

Note: In case of difference in rating by multiple CRAs, the most conservative rating shall be considered.

Credit Event shall also include actual default of either the interest or principal of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments.

The AMC at its sole option and discretion may create Segregated Portfolio in the Scheme, with the approval of the Trustees, subject to the following:

Segregated portfolio may be created, in case of a Credit Event at issuer level.

Creation of Segregated Portfolio shall be based on issuer level Credit Events as detailed above and implemented at the ISIN level.

Further, Segregated Portfolio may be created of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments but only in case of actual default of

either the interest or principal amount and subject to guidelines prescribed by SEBI in this behalf from time to time.

It may be noted that even for the same security (ISIN level) held by multiple Schemes, the AMC, in its sole discretion, may decide to segregate the portfolio only for select Schemes.

It may be noted that notwithstanding the above, segregation of portfolio may be effected in such events and in such manner as may be permitted by SEBI whether by changes to circulars or guidelines in this behalf or by way of clarifications issued thereto from time to time or in any other manner.

# **Process for creation of Segregated Portfolio:**

- a) In case the AMC decides on creation of Segregated Portfolio on the day of a Credit event it shall:
  - i. seek approval of trustees prior to creation of the Segregated Portfolio.
  - ii. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors and also disclose that the segregation shall be subject to trustee approval. Additionally, the said press release shall be prominently disclosed on the website of HDFC Mutual Fund ("the Fund").
  - iii. ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of Credit Event, the subscription and redemption in the scheme(s) shall be suspended for processing with respect to creation of units and payment on redemptions.
- b) Process post receipt of trustee approval by the AMC for creation of Segregated Portfolio in the Scheme(s):
  - i. Segregated Portfolio shall be effective from the day of Credit Event
  - ii. The AMC shall issue a press release immediately with all relevant information pertaining to the Segregated Portfolio. The said information shall also be submitted to SEBI.
  - iii. An e-mail or SMS shall be sent to all unit holders of the concerned scheme(s).
  - iv. The NAV of both segregated and Main Portfolio of the Scheme(s) shall be disclosed from the day of the Credit Event.
  - v. All existing investors in the scheme(s) as on the day of the Credit Event shall be allotted equal number of units in the Segregated Portfolio as held in the Main Portfolio.
  - vi. No redemption and subscription shall be allowed in the Segregated Portfolio. However, in order to facilitate exit to unit holders in Segregated Portfolio, the AMC shall enable listing of units of Segregated Portfolio on the recognized stock exchange within 10 working days of creation of Segregated Portfolio and also enable transfer of such units held in demat mode on receipt of transfer requests.
- c) If the trustees do not approve the proposal to Segregate Portfolio, the AMC shall issue a press release immediately informing investors of the same.

Purchase/Switch-in and Repurchase / Redemptions including Switch-outs is not allowed under Segregated Portfolio. However, units of Segregated Portfolio will be listed on a recognized Stock Exchange. Entry / Exit load is not applicable for Segregated Portfolio, if any, since subscription and redemptions shall not be allowed in such Segregated Portfolio.

# Valuation and processing of subscriptions and redemptions

a) Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the Credit Event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

- b) All subscription and redemption requests for which NAV of the day of Credit Event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:
  - i. Upon trustees' approval to create a Segregated Portfolio -
    - Investors redeeming their units will get redemption proceeds based on the NAV of Main Portfolio and will continue to hold the units of Segregated Portfolio.
    - Investors subscribing to the scheme(s) will be allotted units only in the Main Portfolio based on its NAV.
  - ii. In case trustees do not approve the proposal of Segregated Portfolio, subscription and redemption applications will be processed based on the NAV of Total portfolio.

# **TER for the Segregated Portfolio**

- a) The AMC will not charge investment and advisory fees on Segregated Portfolio. However, TER (excluding the investment and advisory fees) may be charged, on a pro-rata basis only upon recovery of the investments in Segregated Portfolio.
- b) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the Main Portfolio (in % terms) of the scheme(s) during the period for which Segregated Portfolio was in existence.
- c) The legal charges related to recovery of the investments of the Segregated Portfolio may be charged to the Segregated Portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the Main Portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- d) The costs related to Segregated Portfolio shall in no case be charged to the Main Portfolio.

#### **Periodic Disclosures:**

In order to enable the existing as well as the prospective investors to take informed decision, inter alia the following disclosures shall be made:

- a) A statement of holding indicating the units held by the investors in the Segregated Portfolio along with the NAV of both Segregated Portfolio and Main Portfolio as on the day of the Credit Event shall be communicated to the investors within 5 working days of creation of the Segregated Portfolio.
- b) Adequate disclosure of the Segregated Portfolio shall appear in the scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Scheme.
- c) Net Asset Value (NAV) of Segregated Portfolio, if any, shall be declared on every Business Day.
- d) Investors of the Segregated Portfolio shall be duly informed of the recovery proceedings of the investments of the Segregated Portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.
- e) The AMC shall make necessary disclosures as mandated by SEBI with respect to Segregated Portfolio, if any, in account statements, monthly/half yearly portfolio statements, scheme annual report, Key Information Memorandum, SID, Scheme Advertisements, Scheme Performance data, AMC's Website, etc.
- f) Unitholders under the Segregated Portfolio, if any, shall be duly informed of the recovery proceedings of the investments of the Segregated Portfolio. Status update may be provided to such unitholders at the time of recovery and also at the time of writing- off of the segregated securities.

# Risk factors associated with Creation of Segregated Portfolio

- a) Investor holding units of Segregated Portfolio may not be able to liquidate their holding till recovery of money from the issuer.
- b) Security comprising Segregated Portfolio may not realise any value.
- c) Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

# Given below is an illustration explaining the segregation of portfolio:

## Scheme Portfolio before the Credit Event

Assets	Amount (Rs.)
Debt A	50,000
Debt B	50,000
Debt C	50,000
Net Assets	1,50,000

Assuming number of units outstanding is 10,000 units

NAV = Net Assets/No of units = 150,000/10,000= Rs.15/-

There is a Credit Event in one of the Security (Debt C). Due to Credit Event the Debt C is valued at Rs. 25,000/- in line with extant SEBI regulations on valuation of such securities. AMC decides to segregate portfolio by segregating exposure in Debt C. The resultant split will be as follows:

#### **Scheme Main Portfolio**

Assets	Amount (Rs.)	
Debt A	50,000	
Debt B	50,000	
Net Assets	100,000	

NAV (Main Portfolio) = 100,000/10,000= Rs.10/-

# **Scheme Segregated Portfolio**

Assets	Amount (Rs.)	
Debt C	25,000	
Net Assets	25,000	

NAV (Segregated Portfolio) = Rs. 25,000/10,000= Rs.2.5/-

Investor (having 1000 units) will see his scheme holdings as follows:

		After Credit Event	
	Event	Main Portfolio	Segregated Portfolio
Market Value of Units (Rs.)	15,000	10,000	2500

No of Units	1000	1000	1000
NAV per unit (Rs.)	15.00	10.00	2.50

# **Monitoring by Trustees**

In order to ensure timely recovery of investments of a Segregated Portfolio, if any, the trustees would continuously monitor the progress and take suitable action as they deem appropriate.

Trustees shall ensure that the AMC puts in sincere efforts to recover the investments of the segregated portfolio and that upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

In order to avoid mis-use of Segregated Portfolio, Trustees shall ensure that a mechanism is in place which will negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the Segregated Portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the Segregated Portfolio of the scheme.

# H. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE? S&P BSE 500 Index (TRI)

The S&P BSE 500 index is designed to be a broad representation of the Indian market. Consisting of the top 500 companies listed at BSE Ltd., the index covers all major industries in the Indian economy.

The index is derived from the constituents of the S&P BSE All Cap. The inclusion of Differential Voting Rights (DVRs) in the index will result in more than 500 stocks in the index. However, the number of companies in the index remains fixed at 500.

The same has been chosen as the Scheme will invest in stocks which are constituents of S&P BSE 500 Index. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing the performance of the Scheme.

The Trustee reserves right to change the benchmark for performance of any of the plans under the scheme in conformity with the investment objectives and appropriateness of the benchmark subject to SEBI (MF) Regulations, and other prevailing guidelines, if any by suitable notification to the investors to this effect.

In accordance with the investment objective and tracking error definition, the Scheme performance will be compared with the total returns of S&P BSE 500 Index.

#### **ABOUT THE UNDERLYING INDEX**

#### **Index Construction**

The following company data points are calculated for each eligible company:

- 1. Average daily total market capitalization
- 2. Annualized traded value
- 3. Trading frequency

These are calculated based on an observation period defined as the prior six-month period, as of the rebalancing reference date. If a stock's listing history is less than six months, as of the rebalancing reference date, all data used in the eligible universe screening and index construction process are from the listing date.

## **Constituent Weightings**

Index constituents are weighted based on their float-adjusted market capitalization.

#### **Index Governance**

The S&P BSE Indices Index Committee oversees the S&P BSE Indices. The Index Committee is composed of full time employees of S&P Dow Jones Indices and the BSE. The Index Committee meets quarterly.

Further, the updated constituents of the Index will be made available on the website of the Fund.

# **Constituent Capping**

In accordance with clause 3.4 of Master Circular, the Index shall comply with the following portfolio concentration norms:

- a) The Index shall have a minimum of 10 stocks as its constituents.
- b) No single stock shall have more than 25% weight in the Index.
- c) The weightage of the top three constituents of the Index, cumulatively shall not be more than 65% of the Index.
- d) The individual constituent of the index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.

The Scheme shall monitor compliance with the aforesaid norms by the Index at the end of every calendar quarter.

Further, the updated constituents of the Index will be made available on the website of the Fund.

If an investor has sold Units, an investor has to deliver the Units to the broker/sub-broker before the securities pay-in day of the settlement cycle on the Stock Exchange(s). The Stock Exchange(s) regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for 'Delivery-In' to his/her/its DP for accepting Units in his/her/its beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her/its DP to his/her/its trading member. The trading member will transfer the Units directly to his/her/its beneficiary account on receipt of the same from NSE's/BSE's Clearing Corporation.

An investor who has sold Units should instruct his/her/its Depository Participant (DP) to give 'Delivery Out' instructions to

transfer the Units from his/her/its beneficiary account to the Pool Account of his/her/its trading member through whom he/she/it have sold the Units. Expense ratio, normally expressed as a percentage of Average Assets under Management, is calculated by dividing the permissible expenses under the Regulations by the average net assets.

To further illustrate the above, for the Scheme under reference, suppose an Investor invested Rs. 10,000/-(after deduction of stamp duty and transaction charges, if any), the impact of expenses charged will be as under:

Amount invested at the beginning of the year (Rs.)	10,000
Returns before expenses (Rs.)	1,500
Expenses	150
Returns after expenses at the end of the year (Rs.)	
Returns (in %)	

# Note(s):

- The purpose of the above illustration is to purely explain the impact of expense ratio charged under the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year.

Any tax impact has not been considered in the above example, in view of the individual nature of the tax
implications. Each investor is advised to seek appropriate advice.

#### **B. TRANSACTION CHARGES**

Exit/Redemption Load	Not Applicable.	

Under the Scheme (s), the Trustee/AMC reserves the right to modify/change the Load structure if it so deems fit in the interest of smooth and efficient functioning of the Mutual Fund.

The Load may also be changed from time to time and in the case of an Exit/Redemption Load this may be linked to the period of holding. Exit load (net of GST) charged, if any, shall be credited to the Scheme. The investor is requested to check the prevailing load structure of the Scheme before investing.

While determining the price of the units, the mutual fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

Any imposition or enhancement of Exit Load in the load shall be applicable on prospective investments only. However, AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of IDCW for existing as well as prospective investors. At the time of changing the load structure the AMC/Mutual Fund may adopt the following procedure.

- (i) The addendum detailing the changes will be attached to Scheme Information Document and Key Information Memorandum and displayed on our website www.hdfcfund.com. ### E. STAMP DUTY ON ALLOTMENT/TRANSFER OF UNITS\*

Mutual fund units issued against Purchase transactions (whether through lump-sum investments or SIP or STP or switch-ins or reinvestment under IDCW Option) would be subject to levy of stamp duty @ 0.005% of the amount invested. Transfer of mutual fund units (such as transfers between demat accounts) are subject to payment of stamp duty @ 0.015%. The rate and levy of stamp duty may vary as amended from time to time.

\*Pursuant to Notification No. S.O. 4419(E) dated December 10, 2019 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, and subsequent Notification dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India.

The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. Units will be created only for the balance amount i.e. net investment amount as reduced by the stamp duty. The stamp duty will be computed at the rate of 0.005% on an inclusive method basis as illustrated below:

For instance: If the investment amount is Rs. 100,100 and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: ((Investment Amount – Transaction Charge)/100.005) \*0.005 = Rs. 5. If the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows: (Investment Amount - Transaction Charge - Stamp Duty)/Applicable NAV = 9,999.50 units.
