The Trustee reserves the right to add any other options/ sub-options under the Scheme.

## **LIQUIDITY**

### **• Purchase / Redemption of Units**

The Scheme will offer for subscription / switch and redemption / switch out of units without any load on Specified Transaction Period (STP). The STP shall be for minimum 2 working days. If any of the STP date falls on a non-business day, the STP shall be extended by one more day which being a business day.

The AMC shall have the flexibility to change / alter the Transaction Period depending on the prevailing market conditions and in the interest of the unit holders.

**Investors are requested to note that the Trustee reserves the right to modify the frequency of liquidity/repurchase facility for the benefit of the investors under each plan of the Scheme.**

**For units held in demat form:**

Investors wishing to purchase/redeem between two STP may do so, in demat mode, by transacting through NSE or any of the stock exchange(s) where the Scheme will be listed, as the Trustee may decide from time to time. Investors shall note that the brokerage on sale of the units of the Scheme on the stock exchanges shall be borne by the investors. For units bought / sold on the exchange, settlement of the trade shall be as per settlement cycle of the stock exchange.

The Trustee reserve the right to suspend/deactivate/freeze trading, ISIN of the Plans under the Interval Schemes. During the STP, trading of units on stock exchange will automatically get suspended.

- **Redemption proceeds:**

Redemption requests for unitholders holding units in physical mode can be submitted to the Fund only during the Specified Transaction Period.

For investors holding units in demat mode, they shall submit the redemption request during the specified transaction period to the depository participant (DP). Such request accepted and processed by the DP shall be recognized by the Registrar and Transfer Agent (RTA) for changes in the beneficiary position (BENPOS) downloaded on the STP date. Accordingly redemption proceeds shall be paid to the unitholders whose names are appearing in the BENPOS on the STP date.

Investors wishing to purchase/redeem between two STP may do so, in demat mode, by transacting through National Stock Exchange of India Ltd. or any of the stock exchange(s) where the scheme will be listed as the Trustee may decide from time to time. Investors shall note that the brokerage on sale of the units of the scheme on the stock exchanges shall be borne by the investors. For units bought / sold on the exchange, settlement of the trade shall be as per settlement cycle of the NSE.

The Trustees reserves the right to suspend/deactivate/freeze trading, ISIN of the Scheme at any time prior to the STP.

The Fund will, under normal circumstances, endeavour to dispatch redemption proceeds within 10 Business Days from the date of acceptance of the redemption request at any of the Customer Service Centers during STP.

Investors can submit redemption/switch-out request(s) at any time before the next applicable Specified Transaction Period (STP). All such redemption/switch-out request(s), will be processed based on the applicable Net Asset Value (NAV) at the next applicable STP. Further, in case of switch-out request for investment in a New Fund Offers/open-ended Schemes, the request shall be processed only if the next applicable STP coincides with the New Fund Offer period or it being a business day in Target open-ended schemes.

This facility is not applicable for Units held in demat form.

## SECTION III: INTRODUCTION

2

### A. **RISK FACTORS**

#### **Standard Risk Factors:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 22.2 lakhs made by it towards setting up the Fund.
- Investors in the Scheme are not being offered any guaranteed/indicated returns.
- The NAV of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures. As with any securities investment, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
- In the event of receipt of inordinately large number of redemption requests or of a restructuring of any of the Scheme's portfolio, there may be delays in the redemption of Units.
- The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
- The Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines and as permitted under the Scheme. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.
- Mutual Funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- Mutual Funds being vehicles of securities, investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of scheme's investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlements periods, trading volumes etc. and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- As the liquidity of the Scheme's investments could at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme's portfolio. In view of this the Trustee has the right, at their sole discretion to limit redemptions

(including suspending redemption) under certain circumstances, as described under the section titled "Right to limit Repurchases/Redemptions".

- From time to time and subject to the regulations, the sponsors, the mutual funds and investment Companies managed by them, their affiliates, their associate companies, subsidiaries of the sponsors and the AMC may invest in either directly or indirectly in the Scheme. The funds managed by these affiliates, associates and/ or the AMC may acquire a substantial portion of the Scheme. Accordingly, redemption of units held by such funds, affiliates/associates and sponsors may have an adverse impact on the units of the Scheme because the timing of such redemption may impact the ability of other unit holders to redeem their units. Further, as per the regulation, in case the AMC invests in any of the schemes managed by it, it shall not be entitled to charge any fees on such investments.
- 1 • The Scheme may invest in other schemes managed by the AMC or in the schemes of any other Mutual Funds, provided it is in conformity to the investment objective of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.
- Different types of securities in which the Scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated/unrated securities offering higher yields. This may increase the risk of the portfolio.

### Scheme Specific Risk Factors

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

#### ➤ Risk Factors associated with investment in Fixed Income Securities

- **Market Risk:** The Net Asset Value (NAV) of the Scheme(s), to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- **Liquidity Risk:** Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme(s) and may lead to the Scheme(s) incurring losses till the security is finally sold.
- **Credit Risk:** Investments in Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- **Price Risk:** Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to

maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

- Different types of fixed income securities in which the Scheme(s) would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme(s) risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive yields. This may increase the risk of the portfolio.
- The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.
- Investment in unrated instruments may involve a risk of default or decline in market value higher than rated instruments due to adverse economic and issuer-specific developments. Such investments display increased price sensitivity to changing interest rates and to a deteriorating economic environment. The market values for unrated investments tends to be more volatile and such securities tend to be less liquid than rated debt securities"

#### ➤ Risk factors associated with investing in Derivatives

- The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the

underlying instrument but also of the derivative itself. Other risks include the risk of mis-pricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

- The Fund may use derivatives instruments like Stock Index Futures, Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.
- The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:
  - Lack of opportunity available in the market.
  - The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
  - Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

➤ **Risk Factors associated with investing in Securitized Debt**

- A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers. Generally available asset classes for securitization in India are:
  - Commercial vehicles
  - Auto and two wheeler pools
  - Mortgage pools (residential housing loans)
  - Personal loan, credit card and other retail loans

- Corporate loans/receivables

In pursuance to SEBI communication dated: August 25, 2010, given below are the requisite details relating to investments in Securitised debt.

- Risk profile of securitized debt vis-à-vis risk appetite of the scheme  
The Scheme aims to provide reasonable returns to investors with a long-term investment horizon. To ensure the scheme targets only long term investors, the scheme has exit loads of up to 1 year which acts as a deterrent to short term investors. Securitised debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity which would match with the long-term investment horizon of these investors. Investment in these instruments will help the fund in aiming at reasonable returns. These returns come with a certain degree of risks which are covered separately in the Scheme Information Document. Accordingly, the medium risk profile of the securitised debt instruments matches that of the prospective investors of these funds.
- Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.
- Risk mitigation strategies for investments with each kind of originator

For a complete understanding of the policy relating to selection of originators, we have first analysed below risks attached to a securitization transaction.

In terms of specific risks attached to securitization, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher, which helps in making their overall risks comparable to other AAA/AA rated asset classes.

The Scheme may invest in securitized debt assets. These assets would be in the nature of Asset Backed securities (ABS) and Mortgage Backed securities (MBS) with underlying pool of assets and receivables like housing loans, auto loans and single corporate loan originators. The Scheme intends to invest in securitized instruments rated AAA/AA by a SEBI recognized credit rating agency.

Before entering into any securitization transaction, the risk is assessed based on the information generated from the following sources:

- (1) Rating provided by the rating agency
- (2) Assessment by the AMC

#### **(1) Assessment by a Rating Agency**

In its endeavor to assess the fundamental uncertainties in any securitization transaction, a credit rating agency normally takes into consideration following factors:

- **Credit Risk**

Credit risk forms a vital element in the analysis of securitization transaction. Adequate credit enhancements to cover defaults, even under stress scenarios, mitigate this risk. This is done by evaluating following risks:

- Asset risk
- Originator risk
- Portfolio risk
- Pool risks

The quality of the pool is a crucial element in assessing credit risk. In the Indian context, generally, pools are 'cherry-picked' using positive selection criteria. To protect the investor from adverse selection of pool contracts, the rating agencies normally take into consideration pool characteristics such as pool seasoning (seasoning represents the number of installments paid by borrower till date: higher seasoning represents better quality), over dues at the time of selection and Loan to Value (LTV). To assess its risk profile vis-à-vis the overall portfolio, the pool is analyzed with regard to geographical location, borrower profile, LTV, and tenure.

- **Counterparty Risk**

There are several counterparties in a securitization transaction, and their performance is crucial. Unlike in the case of credit risks, where the risks emanate from a diversified pool of retail assets, counterparty risks result in either performance or non-performance. The rating agencies generally mitigate such risks through the usage of stringent counterparty selection and replacement criteria to reduce the risk of failure. The risks assessed under this category include:

- Servicer risk
- Commingling risk
- Miscellaneous other counterparty risks

- **Legal Risks**

The rating agency normally conducts a detailed study of the legal documents to ensure that the investors' interest is not compromised and relevant protection and safeguards are built into the transaction.

- **Market Risks**

Market risks represent risks not directly related to the transaction, but other market related factors, stated below, which could have an impact on transaction performance, or the value of the investments to the investors.

- Macro-economic risks
- Prepayment risks
- Interest rate risks

Other Risks associated with investment in securitized debt and mitigation measures

- **Limited Liquidity & Price Risk**

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

Risk Mitigation: Securitised debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity. The liquidity risk and HTM nature

is taken into consideration at the time of analyzing the appropriateness of the securitization.

- **Limited Recourse, Delinquency and Credit Risk**

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

Risk Mitigation: In addition to careful scrutiny of credit profile of borrower/pool additional security in the form of adequate cash collaterals and other securities may be obtained to ensure that they all qualify for similar rating.

- **Risks due to possible prepayments: Weighted Tenor / Yield**

Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

Risk Mitigation: A certain amount of prepayments is assumed in the calculations at the time of purchase based on historical trends and estimates. Further a stress case estimate is calculated and additional margins are built in.

- **Bankruptcy of the Originator or Seller**

If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to Trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a "True Sale". Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

Risk Mitigation: Normally, specific care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a

'true sale'. It is also in the interest of the originator to demonstrate the transaction as a true sell to get the necessary revenue recognition and tax benefits.

- **Bankruptcy of the Investor's Agent**

If Investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent. Legal opinion is normally obtained to the effect that the Investors Agent's recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

Risk Mitigation: All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent.

- **Credit Rating of the Transaction / Certificate**

The credit rating is not a recommendation to purchase, hold or sell the Certificate in as much as the ratings do not comment on the market price of the Certificate or its suitability to a particular investor. There is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

- **Risk of Co-mingling**

With respect to the Certificates, the Servicer will deposit all payments received from the Obligor into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

**(2) Assessment by the AMC**

**Mapping of structures based on underlying assets and perceived risk profile**

The scheme will invest in securitized debt originated by Banks, NBFCs and other issuers of investment grade credit quality and established track record. The AMC will evaluate following factors, while investing in securitized debt:

- **Originator**

Acceptance Evaluation Parameters (For Pool Loan and Single Loan Securitization Transactions)

- **Track record**

The AMC ensures that there is adequate past track record of the Originator before

selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc.

- **Willingness to pay**

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank, guarantee etc. is obtained, as a risk mitigation measure.

- **Ability to pay**

This assessment is based on a strategic framework for credit analysis, which entails a detailed financial risk assessment.

Management analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality. Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the company as well as agency

#### Critical Evaluation Parameters (For Pool Loan and Single Loan Securitization Transactions)

Typically the AMC would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if there are concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

#### **Advantages of Investments in Single Loan Securitized Debt**

- **Wider Coverage:** A Single Loan Securitized Debt market offers a more diverse range of issues / exposures as the Banks / NBFCs lend to larger base of borrowers.
- **Credit Assessment:** Better credit assessment of the underlying exposure as the Banks / NBFCs ideally co-invest in the same structure or take some other exposure on the same borrower in some other form.

- **Better Structuring :** Single Loan Securitized Debt investments facilitates better structuring than investments in plain vanilla debt instruments as it is governed by Securitization guidelines issued by RBI.
- **Better Legal documentation:** Single Loan Securitized Debt structures involve better legal documentation than Non-Convertible Debenture (NCD) investments.
- **End use of funds:** Securitized debt has better standards of disclosures as well as limitation on end use of funds as compared to NCD investments wherein the end use is general corporate purpose.
- **Yield enhancer:** Single Loan Securitized Debt investments give higher returns as compared to NCD investments in same corporate exposure.
- **Regulator supervision:** Macro level supervision from RBI in Securitization Investments as compared to NCD investments.
- **Tighter covenants:** Single Loan Securitized Debt structures involve tighter financial covenants than NCD investments.

#### **Disadvantages of Investments in Single Loan Securitized Debt**

- **Liquidity risk:** Investments in Single Loan Securitized Debts have relatively less liquidity as compared to investments in NCDs.
- **Co-mingling risk:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Table below illustrates the framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

<b>Characteristics/Type of Pool</b>	<b>Mortgage Loan</b>	<b>Commercial Vehicle and Construction Equipment</b>	<b>CAR</b>	<b>2 wheelers</b>	<b>Micro Finance Pools</b>	<b>Personal Loans</b>
Approximate Average maturity (in Months)	36-120 months	12- 60 months	12-60 months	15-48 months	15-80 weeks	5 months - 3 years
Collateral margin (including cash ,guarantees, excess interest spread , subordinate tranche)	3-10%	4-12%	4-13%	4-15%	5-15%	5-15%
Average Loan to Value Ratio	75%-95%	80%-98%	75%-95%	70%-95%	Unsecured	Unsecured
Average seasoning of the Pool	3-5 months	3-6 months	3-6 months	3-5 months	2-7 weeks	1-5 months
Maximum single exposure range	4-5%	3-4%	NA (Retail Pool)	NA (Retail Pool)	NA (Very Small Retail	NA (Retail Pool)

					loan)	
Average single exposure range %	0.5%-3%	0.5%-3%	<1% of the Fund size	<1% of the Fund size	<1% of the Fund size	<1% of the Fund size

**Notes:**

1. Retail pools are the loan pools relating to Car, 2 wheeler, micro finance and personal loans, wherein the average loan size is relatively small and spread over large number of borrowers.
2. Information illustrated in the Tables above, is based on the current scenario relating to Securitized Debt market and is subject to change depending upon the change in the related factors.
3. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments
4. Majority of our securitized debt investments shall be in asset backed pools wherein we'll have underlying assets as Medium and Heavy Commercial Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment etc. Where we invest in Single Loan Securitization, as the credit is on the underlying issuer, we focus on the credit review of the borrower. A credit analyst sets up limit for various issuers based on independent research taking into account their historical track record, prevailing rating and current financials.

In addition to the framework as per the table above, we also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- **Size of the Loan:** We generally analyze the size of each loan on a sample basis and analyze a static pool of the originator to ensure the same matches the Static pool characteristics. Also indicates whether there is excessive reliance on very small ticket size, which may result in difficult and costly recoveries. To illustrate, the ticket size of housing loans is generally higher than that of personal loans. Hence in the construction of a housing loan asset pool for say Rs.1,00,00,000/- it may be easier to construct a pool with just 10 housing loans of Rs.10,00,000 each rather than to construct a pool of personal loans as the ticket size of personal loans may rarely exceed Rs.5,00,000/- per individual. Also to amplify this illustration further, if one were to construct a pool of Rs.1,00,00,000/- consisting of personal loans of Rs.1,00,000/- each, the larger number of contracts (100 as against one of 10 housing loans of Rs.10 lakh each) automatically diversifies the risk profile of the pool as compared to a housing loan based asset pool.
- **Average Original Maturity of the Pool:** indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. To illustrate, in a car pool consisting of 60-month contracts, the original maturity and the residual maturity of the pool viz. number of remaining installments to be paid gives a better idea of the risk of default of the pool itself. If in a pool of 100 car loans having original maturity of 60 months, if more than 70% of the contracts have paid more than 50% of the installments and if no default has been observed in such contracts,

this is a far superior portfolio than a similar car loan pool where 80% of the contracts have not even crossed 5 installments.

- **Default Rate Distribution:** We generally ensure that all the contracts in the pools are current to ensure zero default rate distribution. Indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here being, as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.
- **Geographical Distribution:** Regional/state/ branch distribution is preferred to avoid concentration of assets in a particular region/state/branch.
- **Loan to Value Ratio:** Indicates how much % value of the asset is financed by borrower's own equity. The lower LTV, the better it is. This Ratio stems from the principle that where the borrowers own contribution of the asset cost is high, the chances of default are lower. To illustrate for a Truck costing Rs.20 lakhs, if the borrower has himself contributed Rs.10 lakh and has taken only Rs.10 lakh as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs.20 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only Rs.2 lakh out of his own equity for a truck costing Rs.20 lakh. Between the two scenarios given above, the latter would have higher risk of default than the former.
- **Average seasoning of the pool:** indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loan, if a pool of assets consist of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than one where only 10% of installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.
- **Risk Tranching:** Typically, we would avoid investing in mezzanine debt or equity of Securitized debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.

➤ **Risk Factors associated with investing in Gilt Securities**

- Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to government securities but is true for all fixed income securities. The default risk however, in respect of Government securities is zero. Therefore, their prices are influenced only by movement in interest rates in the financial system. On the other hand, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced by credit standing of the issuer as well as the general level of interest rates.
- Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

## ➤ **Risks associated with Securities Lending & Short Selling:**

The scheme will not engage in securities lending & short selling.

### ➤ **Risk associated with Investing in money market instruments:**

- **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.
- **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.

### ➤ **Risks associated with investment in Foreign Securities:**

The Scheme will not take exposure to investments in Foreign Securities.

### **3. Risk Mitigation Strategies:**

- The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.
- The Fund has identified following risks of investing in debt securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

### **RISK MANAGEMENT STRATEGIES**

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

### **Risks associated with Debt investment**

<p><b>Market Risk/ Interest Rate Risk</b> As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The Scheme will undertake the active portfolio management as per the investment objective to reduce the market risk. In a rising interest rates scenario the Scheme will increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity will be increased thereby mitigating risk to that extent.</p>
<p><b>Liquidity or Marketability Risk</b> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).</p>	<p>The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Scheme will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.</p>
<p><b>Credit Risk</b> Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).</p>	<p>Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower.</p> <p>In case of securitized debt instruments, the Scheme will ensure that these instruments are sufficiently backed by assets.</p>
<p><b>Reinvestment Risk</b> This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which interim cash flows can be</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p>

reinvested may be lower than that originally assumed.	
<div style="display: flex; align-items: center;"> <div style="background-color: #00FF00; padding: 2px 5px; margin-right: 5px;"><b>Derivatives Risk</b></div> <div style="border: 1px solid black; padding: 2px 5px; margin-right: 5px;">5</div> </div> <p>As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.</p>	<p>The Scheme has provision for using derivative instruments for portfolio balancing and hedging purposes. Interest Rate Swaps will be done with approved counter parties under pre-approved ISDA agreements. Mark to Market of swaps, netting off of cash flow and default provision clauses will be provided as per international best practice on a reciprocal basis. Interest rate swaps and other derivative instruments will be used as per local (RBI and SEBI) regulatory guidelines.</p>

## B. REQUIREMENT OF MINIMUM INVESTORS:

The Scheme and individual Plans under the Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment and at each Specified Transaction Period. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme/Plan(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 business days of the date of closure of the Specified Transaction Period.

## C. SPECIAL CONSIDERATIONS, if any

- Investors in the Scheme are not being offered any guaranteed returns.
- Investors are advised to consult their Legal /Tax and other Professional Advisors in regard to tax/legal implications relating to their investments in the Plan/s and before making decision to invest in or redeem the Units.
- Investors are urged to study the terms of the SID carefully before investing in these Scheme, and to retain this SID for future reference.

## SECTION IV - INFORMATION ABOUT THE SCHEME

### A. TYPE OF THE SCHEME – A Debt Oriented Interval Fund

### B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

The investment objective of the scheme is to generate optimal returns consistent with moderate levels of risk and liquidity by investing in debt securities and money market securities maturing on or before the opening of the immediately following Specified Transaction Period (STP).

However, there can be no assurance that the Investment Objective of the Scheme will be realized.

### C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

14

Under normal circumstances, the asset allocation under the Schemes will be as follows:

Particulars	Minimum	Maximum	Risk Profile
Money Market Instruments	0%	70%	Medium to Low
Government Securities issued by Central & / or state govt. and other fixed income / debt securities* including but not limited to corporate debt and securitised debt	30%	100%	Medium to Low

4

\* Debt securities may include securitised debt which may go up to 70% of the portfolio and derivative instruments to the extent of 50% of the net assets of the Scheme. The Scheme will hold securities of residual maturity which matures on or before the opening of the immediately following STP.

- It may be noted that no prior intimation/indication would be given to investors when the composition/asset allocation pattern under the Scheme undergo changes within the permitted band as indicated above or for changes due to defensive positioning of the portfolio with a view to protect the interest of the unit holders on a temporary basis. The investors/unit holders can ascertain details of asset allocation of the scheme as on the last date of each month on AMC's website at [www.icicipruamc.com](http://www.icicipruamc.com) that will display the asset allocation of the scheme as on the given day.
- The securities mentioned in the asset allocation pattern could be listed, unlisted, privately placed, secured or unsecured, rated or unrated and of any maturity. The securities may be acquired through secondary market purchases, Initial Public Offering (IPO), other public offers, Private Placement, right offers (including renunciation) and negotiated deals.
- The cumulative gross exposure should not exceed 100% of the net assets of the scheme.

### **Credit Evaluation Policy for investment in debt securities**

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks so the Investment process is firmly research oriented. It comprises qualitative as well as quantitative measures. Qualitative factors like management track record, group companies, resource-raising ability, extent of availability of banking lines, internal control systems, etc. are evaluated in addition to the business model and industry within which the issuer operates as regards industry/model-specific risks working capital requirements, cash generation, seasonality, regulatory environment, competition, bargaining power, etc. Quantitative factors like debt to equity ratio, Profit and loss statement analysis, balance sheet analysis are taken into further consideration.

Macroeconomic call is taken on interest rate direction by careful analysis of various influencing factors like Inflation, Money supply, Private sector borrowing, Government borrowing, Currency market movement, Central Bank policy, Local fiscal and monetary policy, Global interest rate scenario and Market sentiment. Interest rate direction call is supplemented by technical analysis of market and short term influencing factors like trader position, auction/issuance of securities, release of economic numbers, offshore market position, etc. Interest Rate direction call and anticipation of yield curve movement forms the basis of portfolio positioning in duration and spread terms. Credit research is done on a regular basis for corporate having high investment grade rating. Credit research includes internal analysis of rating rationale, and financial statements (annual reports and quarterly earnings statements) of the issuer, for the last 1-3 years evaluating amongst other metrics, relevant ratios of profitability, capital adequacy, gearing, turnover and other inputs from external agencies. On an ongoing basis, the credit analyst keeps track of credit profile of the issuer, possible credit risks reflected in change in outlook of rating agencies, external developments affecting the issuer etc. Internal credit call is a pre-requisite for all investments since the investment universe is primarily high-grade credit instruments. Credit research is also used to minimize credit migration risk and for generating relative value trade ideas. Stable to higher rating on maturity vis-à-vis issuance is the guiding factor for investment decisions from credit point of view.

### **Change in Investment Pattern**

Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and defensive considerations.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the Regulations, as detailed later in this document.

## **D. WHERE WILL THE SCHEME INVEST?**

15

Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

- 1) Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 2) Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- 3) Fixed Income Securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- 4) Corporate debt (of both public and private sector undertakings)
- 5) Securities of banks (both public and private sector) including term deposit with the banks as permitted by SEBI/RBI from time to time and development financial institutions
- 6) Money market instruments as permitted by SEBI/RBI, having maturities of up to one year.
- 7) Certificate of Deposits (CDs)
- 8) Commercial Paper (CPs)
- 9) Securitised Debt
- 10) The non-convertible part of convertible securities
- 11) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time.
- 12) Derivative instruments like Interest Rate Swaps, Forward Rate Agreements, Stock Index Futures and such other derivative instruments permitted by SEBI/RBI.

7

## **E. WHAT ARE THE INVESTMENT STRATEGIES?**

The Scheme is a Debt Oriented Interval Fund and its objective is to generate regular returns by investing in a portfolio of Fixed income securities / debt instruments which mature on or before the opening of the immediately following specified transaction period.

Under normal circumstances, up to 100% of the fund will be invested in Money Market instruments, Short term and medium term debt securities/ debt instruments and securitised debt.

### **Portfolio Turnover**

Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.

12

## **POSITION OF DEBT MARKET IN INDIA**

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited

number of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitized Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers. While in the corporate bond market, deals are conducted over telephone and are entered on principal-to-principal basis, due to the introduction of the Reserve Bank of India's NDS- Order Matching system a significant proportion of the government securities market is trading on the new system.

The yields and liquidity on various securities as on January 31, 2017 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 days	6.20%	High
GOI	Treasury Bill	364 days	6.17%	High
GOI	Short Dated	1-3 Yrs	6.23%-6.30%	High
GOI	Medium Dated	3-5 Yrs	6.30%-6.50%	High
GOI	Long Dated	5-10 Yrs	6.50%-7.04%	High
Corporates	Taxable Bonds (AAA)	1-3 Yrs	6.88%-7.07%	Medium
Corporates	Taxable Bonds (AAA)	3-5 Yrs	7.07%- 7.33%	Low to medium
Corporates	CDs (A1+)	3 months	6.33%	Medium to High
Corporates	CPs (A1+)	3 months	7.08%	Medium to High

## POSITION OF G-SEC MARKET IN INDIA:

The Government Securities (G-Secs) market is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the government securities which are referred to as the risk-free rate of return in any economy.

The Government securities market has witnessed significant changes during the past decade. Introduction of an electronic screen based trading system, dematerialized holding, straight through processing, establishment of the Clearing Corporation of India Ltd. (CCIL) as the central counterparty (CCP) for guaranteed settlement, new instruments, and changes in the legal environment are some of the major aspects that have contributed to the rapid development of the market.

Major players in the Government securities market include commercial banks and primary dealers besides institutional investors like insurance companies. Primary Dealers

play an important role as market makers in Government securities market. Other participants include co-operative banks, regional rural banks, mutual funds, provident and pension funds. Foreign Institutional Investors (FIIs) are allowed to participate in the Government securities market within the quantitative limits prescribed from time to time. Corporates also buy/ sell the government securities to manage their overall portfolio risk.

Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

### **Fixed Income securities**

The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the Risk team of the AMC. The credit evaluation includes a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer, the short as well as longer-term financial health of the issuer. Rated debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided by the ratings of such Rating Agencies as approved by SEBI to carry out the functioning of Rating agencies, for this purpose. In case a debt instrument is not rated, such investments shall be made by the Board of Trustees and the Board of Asset Management Company or by an internal committee constituted by AMC to approve the investment in un-rated debt securities in terms of the parameters approved by the Board of Trustees and the Board of Asset Management Company.

In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The Scheme could invest in Fixed Income Securities issued by government, quasi government entities, corporate issuers, structured notes and various other institutions in line with the investment objectives of the Scheme as permitted by SEBI from time to time

### **Procedure followed for Investment decisions**

- a) The Fund Manager of the scheme is responsible for making buy/sell decisions in respect of the securities in the scheme portfolios.
- b) The AMC has an Internal Investment Committee comprising the Managing Director, the Chief Investment Officer (CIO), Head – Research, Portfolio Managers and Credit Analysts who meet at periodic intervals. The Investment Committee, at its meetings, reviews the performance of the Plans and general market outlook and formulates broad investment strategy. The Managing Director attends the meeting at his discretion.
- c) The CIO who chairs the Investment Committee Meetings guides the deliberations at Investment Committee. He, on an ongoing basis, reviews the portfolios of the Plans and gives directions to the respective fund managers, where considered necessary. It is the ultimate responsibility of the CIO to ensure that the investments are made as

per the internal/Regulatory guidelines, Scheme investment objectives and in the best interest of the unitholders of the respective Schemes.

- d) The Managing Director makes a presentation to the Board of AMC at each of its meetings indicating the performance of the Scheme.
- e) The performance of the Scheme will be benchmarked against its respective benchmarks. The Trustee reserves right to change the benchmark for performance of any of the Scheme by suitable notification to the investors to this effect.
- f) The Managing Director brings to the notice of the Board specific factors, if any, which are impacting the performance of any individual Scheme. The Board on consideration of all relevant factors may, if necessary, give directions to AMC. Similarly, the performance of the Scheme is submitted to the Trustees. The Managing Director explains to the Trustees the details on Schemes' performance vis-à-vis the benchmark returns.
- g) Subsequent to the issue of Circular No.MFD/CIR/9/120/2000 dated November 24, 2000, the Board has constituted a Committee to approve the investment in un-rated debt securities. All such investments, as and when are made, will be placed before the Board of Directors of AMC for its review. Also such investments are approved by the Board of Trustees.
- h) The AMC has been recording investment decisions since the receipt of instructions from SEBI, in terms of SEBI's circular no. MFD/CIR/6/73/2000 dated July 27, 2000.
- i) The Chief Executive Officer of the AMC shall ensure that the mutual fund complies with all the provisions of SEBI (Mutual Funds) Regulations, 1996, as amended from time to time, including all guidelines, circulars issued in relation thereto from time to time and that the investments made by the fund managers are in the interest of the unit holders and shall also be responsible for the overall risk management function of the mutual fund.
- j) The Fund managers shall ensure that the funds of the Scheme are invested to achieve the investment objectives of the Scheme and in the interest of the unit holders.

## **EXPOSURE TO DERIVATIVES**

### **Debt Derivatives**

The Scheme may use derivatives instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time for the purpose of hedging and portfolio balancing and as may be permitted under the Regulations and guidelines.

Interest rate swap is a strategy in which one party exchanges a stream of interest for another party's stream. Interest rate swaps are normally 'fixed against floating', but can also be 'fixed against fixed' or 'floating against floating' rate swaps. Interest rate swaps will be used to take advantage of interest-rate fluctuations, by swapping fixed-rate obligations for floating rate obligations, or swapping floating rate obligations to fixed-rate obligations. A floating-to-fixed swap increases the certainty of an issuer's future obligations. Swapping from fixed-to-floating rate may save the issuer money if interest

rates decline. Swapping allows issuers to revise their debt profile to take advantage of current or expected future market conditions.

The Scheme shall under normal circumstances not have exposure of more than 50% of its net assets in derivative instruments, unless stated otherwise anywhere else in this SID.

#### **i) Advantages of Derivatives**

The volatility in Indian debt markets has increased over last few months. Derivatives provide unique flexibility to the Scheme to hedge part of their portfolio. Some of the advantages of specific derivatives are as under:

#### **ii) Interest Rate Swaps and Forward rate Agreements**

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets.

Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for the liquidity and at the same time take advantage of fixed rates by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

The following is an illustration how derivatives work

Basic Details: Fixed to floating swap

Notional Amount: Rs. 5 Crores

Benchmark: NSE MIBOR

Deal Tenor: 3 months (say 91 days)

Documentation: International Securities Dealers Association (ISDA).

Let us assume the fixed rate decided was 10%

At the end of three months, the following exchange will take place:

Counter party 1 pays: compounded call rate for three months, say 9.90%

Counter party 2 pays fixed rate: 10%

In practice, however, the difference of the two amounts is settled. Counter party 2 will pay Rs. 5 Crores  $\times 0.10\% \times 91/365 =$  Rs. 12,465.75

Thus the trade off for the Fund will be the difference in call rate and the fixed rate payment and this can vary with the call rates in the market. Please note that the above example is given for illustration purposes only and the actual returns may vary depending on the terms of swap and market conditions.

**Risk Factor:** The risk arising out of uses of the above derivative strategy as under:

- Lack of opportunities available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

#### **iii) Interest Rate Futures:**

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an

index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

The underlying security for IRF could be either Government Securities or Treasury Bills. Currently, exchange traded Interest Rate Futures traded on exchange are standardized contracts based on 10-Year Government of India Security and 91 day Treasury bill. IRF contracts are cash settled.

IRFs give an opportunity in the fixed income market to hedge interest rate risk or rebalance the portfolio by using them. By locking into a price, the IRF contract can help to eliminate the interest rate risk. Thus, in order to protect against a fall in the value of the portfolio due to falling bond prices, one can take short position in IRF contracts.

Example:

Date: Dec 01, 2016

Spot price of the Government Security: Rs.108.83

Price of IRF– Dec contract: Rs. 108.90

On Dec 01, 2016, Fund buys 1000 units of the Government security from the spot market at Rs. 108.83. Subsequently, it is anticipated that the interest rate will rise in the near future. Therefore to hedge the exposure in underlying Government security, Fund sells Dec 2016 Interest Rate Futures contracts at Rs. 108.90.

On Dec 15, 2016 due to increase in interest rate:

Spot price of the Government Security: Rs. 107.24

Futures Price of IRF Contract: Rs.107.30

Loss in underlying market will be  $(107.24 - 108.83) \times 1000 = \text{Rs. } 1,590$

Profit in the Futures market will be  $(107.30 - 108.90) \times 1000 = \text{Rs. } 1,600$

### Valuation of Derivative Products

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996.
- ii. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996.

Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the mutual fund in short term deposits.

- d. No mutual fund Scheme shall park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- e. Trustees shall ensure that no funds of a Scheme may be parked in short term deposit of a bank which has invested in that Scheme.

**These conditions are not applicable to term deposits placed as margins for trading in cash and derivative market.**

- f. Asset Management Company (AMC) shall not be permitted to charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks in case of liquid and debt oriented Schemes.
  - g. All funds parked in short term deposit(s) shall be disclosed in half yearly portfolio statements under a separate heading. Details such as name of the bank, amount of funds parked, percentage of NAV may be disclosed.
  - h. Trustees shall certify in the half-yearly reports that the provision of the Regulation pertaining to parking of funds in short term deposits - pending deployment is being complied with at all points of time. Further the AMC shall also certify the same in its bi-monthly compliance test report.
13. The Mutual Fund having an aggregate of securities which are worth Rs.10 crores or more, as on the latest balance sheet date, shall subject to such instructions as may be issued from time to time by the Board, settle their transactions entered on or after January 15, 1998 only through dematerialised securities. Further, all transactions in government securities shall be in dematerialised form.
14. In accordance with SEBI circular no. Cir / IMD / DF / 19 / 2010 dated November 26, 2010; Investments shall be permitted only in such securities which mature on or before the opening of the immediately following specified transaction period.

Explanation: In case of securities with put and call options the residual time for exercising the put option of the securities shall not be beyond the opening of the immediately following transaction period.

15. The Scheme will comply with any other Regulation applicable to the investments of mutual funds from time to time.
16. Group exposure –
- a. The Fund shall ensure that total exposure of the debt scheme in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the Scheme. Such investment limit may be extended to 25% of the net assets of the Scheme with the prior approval of the Board of Trustees.
  - b. For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

All investment restrictions shall be applicable at the time of making investment.

The Trustee may alter the above restrictions from time to time to the extent that changes in the Regulations may allow or as deemed fit in the general interest of the unit holders.

The Trustee /AMC may alter the above stated limitations from time to time, and also to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make their

investments in the full spectrum of permitted investments in order to achieve their investment objective.

Dividend Policy	<p>(i) Growth Option</p> <p>The Scheme will not declare any dividends under this option. The income earned by the Scheme will remain</p>

	<p>reinvested in the Scheme and will be reflected in the Net Asset Value. This option is suitable for investors who are not looking for regular income but who have invested with the intention of capital appreciation.</p> <p>(ii) Dividend Option This option is suitable for investors seeking income through dividend declared by the Scheme. The Trustee may approve the distribution of dividend by AMC out of the net surplus under this Option. The remaining net surplus after considering the dividend and tax, if any, payable there on will be ploughed back in the Scheme and be reflected in the NAV.</p> <p>(iii) Dividend Payout: As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, dividend warrants within 30 days of declaration of the Dividend. Dividends will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). Dividends will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of dividend to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form. To safeguard the interest of Unit Holders from loss or theft of dividend cheques, investors should provide the name of their bank, branch and account number in the application form. Dividend cheques will be sent to the Unit Holder after incorporating such information.</p> <p>The Trustee reserves the right to declare dividends under the dividend option of the Scheme depending on the net distributable surplus available under the Scheme. It should, however, be noted that actual distribution of dividends and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustee. On payment of dividends, the NAV will stand reduced by the amount of dividend and dividend tax (if applicable) paid.</p> <p>The dividend will be distributed in accordance with applicable SEBI Regulations and SEBI Circular no. SEBI/IMD/ Cir No. 1/ 64057/06 dated April 4, 2006 on the procedure for Dividend Distribution.</p> <p>The requirement of giving dividend notice shall not be applicable for Dividend Options having frequency up to one month.</p>
Dividend	The dividend warrants shall be dispatched to the unit

	<p>holders within 30 days of the date of declaration of the dividend.</p> <p>In the event of failure to dispatch dividend within 30 days, the AMC shall be liable to pay interest at 15% per annum to the unit holders.</p> <p>The treatment of unclaimed redemption &amp; dividend amount will be as per SEBI circular dated Feb 25, 2016.</p>

#### **D. COMPUTATION OF NAV**

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the Valuation Policy and Procedures of the Fund, provided in SAI.

The NAV of the Scheme shall be rounded off up to four decimals.

NAV of units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No. of Units outstanding under Scheme}}$$

The NAV of the Scheme will be calculated as of the close of every Business Day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

## SECTION VI: FEES AND EXPENSES

This section outlines the expenses that will be charged to the Scheme.

### A. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. As per SEBI circular SEBI/IMD/CIR No.1/64057/06 dated April 4, 2006, open ended schemes are not permitted to charge NFO Expenses to the scheme. In case of schemes launched after the date of the Circular, no NFO expenses were charged to the scheme. In case of schemes launched before the date of the aforementioned SEBI Circular, the NFO expenses did not exceed the regulatory limit of 6% (applicable at that time) of the initial resources mobilized.

### B. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that the following percentage of the daily net assets of the Scheme will be charged to the Scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund. The mutual fund would update the current expense ratios on the website within two working days mentioning the effective date of the change.

<b>Additional expenses for gross new inflows from specified cities* (more specifically elaborated below)</b>	<b>Up to 0.30</b>
<b>The aforesaid does not include service tax on investment management and advisory fees. The same is more specifically elaborated below.</b>	

\*As permitted under the Regulation 52 of SEBI (MF) Regulations and pursuant to SEBI circular no. CIR/IMD/ DF/21/2012 dated September 13, 2012 and SEBI (Mutual Funds) Second Amendment Regulations, 2012.

\$ Listing expenses are part of other expenses, wherever applicable.

The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the Scheme will bear.

ICICI Prudential Annual Interval Plan I -Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc as compared to ICICI Prudential Annual Interval Plan I and no commission for distribution of Units will be paid/ charged under ICICI Prudential Annual Interval Plan I - Direct Plan.

The aforesaid expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations. This means that mutual fund can charge expenses within overall limits, without any internal cap on the aforesaid expenses head.

Types of expenses charged shall be as per the SEBI (Mutual Fund) Regulation, 1996.

As per the Regulations, the maximum recurring expenses that can be charged to debt Schemes shall be subject to a percentage limit of daily net assets as in the table below:

<b>First Rs. 100 crore</b>	<b>Next Rs. 300 crore</b>	<b>Next Rs. 300 crore</b>	<b>Over Rs. 700 crore</b>
2.25%	2.00%	1.75%	1.50%

The above excludes additional expenses that can be charged towards: i) 20 bps under the Regulation 52(6A)(c), ii) 30 bps for gross new inflows from specified cities and iii) service tax on investment management and advisory fees. The same is more specifically elaborated below.

Pursuant to SEBI circular no. CIR/IMD/DF/21/2012 dated September 13, 2012 and SEBI (Mutual Funds) Second Amendment Regulations, 2012, following additional costs or expenses may be charged to the Scheme, namely:

(i) The AMC may charge service tax on investment and advisory fees to the Scheme of the Fund in addition to the maximum limit of total expenses ratio as prescribed in Regulation 52 of the Regulations, whereas service tax on other than investment and

advisory fees, if any, shall be borne by the Scheme within the maximum limit as per regulation 52 of the Regulations.

(ii) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by the Securities and Exchange Board of India, from time to time are at least –

- 30 per cent of the gross new inflows into the scheme, or;
- 15 per cent of the average assets under management (year to date) of the scheme,

whichever is higher;

Provided that if inflows from such cities are less than the higher of the above, such expenses on daily net assets of the scheme shall be charged on proportionate basis;

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities;

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

(iii) Additional expenses, incurred towards different heads mentioned under sub-regulations (2) and (4) of Regulation 52 of the Regulations, not exceeding 0.20 per cent of daily net assets of the scheme.

At least 2 basis points on daily net assets within the maximum limit of overall expense Ratio shall be annually set apart for investor education and awareness initiatives.

Further, the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Service tax on brokerage and transaction cost paid for execution of trade, if any, shall be within the limit prescribed under regulation 52 of the Regulations.

Subject to Regulations, expenses over and above the prescribed limit shall be borne by the Asset Management Company.

The following is an illustration of the impact of expense ratio on the scheme's returns:

	Particulars	Year 1	Year 2
(A)	Net Assets Before expenses	50,00,00,000.00	58,92,00,000.00
	NAV per Unit Before Expense	10.00	11.78
	Return Before Expense	-	20.00%
(B)	<b>Total Expenses (1.8% of Net Assets Before Expenses)</b>	<b>90,00,000.00</b>	<b>1,00,00,000.00</b>
(A-B)	<b>Net Assets After expenses</b>	<b>49,10,00,000.00</b>	<b>57,92,00,000.00</b>

### **C. LOAD STRUCTURE**

Load is an amount, which is paid by the investor to subscribe to the units or to redeem the units from the Scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC ([www.icicipruamc.com](http://www.icicipruamc.com)) or may call your distributor.

**Entry Load:** Not Applicable.

In terms of SEBI circular no. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009 has notified that, w.e.f. August 01, 2009 there will be no entry load charged to the Schemes of the Mutual Fund and the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

**Exit Load:** Refer para, "Highlights of the scheme"

Any redemption/switch arising out of excess holding by an investor beyond 25% of the net assets of the Scheme in the manner envisaged under specified SEBI Circular No. SEBI/IMD/CIR No. 10/22701/03 dated 12<sup>th</sup> December 2003, such redemption / switch will not be subject to exit load.

The exit load charged, if any, shall be credited back to the respective scheme. Service tax on exit load shall be paid out of the exit load proceeds and exit load net of service tax shall be credited to the Scheme.

The investor is requested to check the prevailing load structure of the Scheme before investing. For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres. Any imposition or enhancement in the load shall be applicable on prospective investments only.

Subject to the Regulations, the Trustee reserves the right to modify/alter the load structure on the Units subscribed/redeemed on any Business Day. Such changes will be applicable for prospective investments. The Trustee shall arrange to display a notice in the Customer Service Centers of the AMC before the change of the then prevalent load structure. The SID will be updated in respect of changes in the load structure as per the addendum issued. The addendum detailing the changes in the load structure will be published by AMC in 2 daily newspapers- one in regional language and the other in English language newspaper. Changes in the fundamental attributes may be stamped in the acknowledgement slip issued by the Fund after the changes in load structure.

### **D. WAIVER OF LOAD FOR DIRECT APPLICATIONS**

Not Applicable

## SECTION VII: RIGHTS OF UNIT HOLDERS

Please refer to SAI for details.

20

## SECTION VIII: Penalties, Pending Litigation or Proceedings, Findings of Inspections or Investigations for which action may have been taken or is in the process of being taken by any Regulatory Authority

- 1) All disclosures regarding penalties and action(s) taken against foreign Sponsor(s) may be limited to the jurisdiction of the country where the principal activities (in terms of income / revenue) of the Sponsor(s) are carried out or where the headquarters of the Sponsor(s) is situated. Further, only top 10 monetary penalties during the last three years shall be disclosed.
- In March 2013, Prudential plc and its wholly-owned subsidiary The Prudential Assurance Company Limited settled with the UK's former financial services regulator, the Financial Services Authority (FSA) over issues relating to Prudential's unsuccessful bid to acquire AIA, the Asian subsidiary of AIG, in early 2010.

These Prudential companies agreed to pay fines totalling £30 million, in respect of a decision by the FSA that it and the United Kingdom Listing Authority (UKLA) should have been informed earlier about Prudential's contemplation of the potential transaction. The Group Chief Executive, Tidjane Thiam, also agreed to be censured in respect of a decision by the FSA that it should have been informed earlier. The Final Notices published by the FSA on 27 March 2013 concerning these decisions accordingly represent the final resolution of the matter.

In a public statement accompanying the Final Notices dated 27 March 2013, the FSA stated that the investigation was into past events and did not concern the current conduct of the management of the Prudential Group. The FSA accepted that Prudential did consider their obligations in forming their assessment in respect of informing the regulator. Therefore, although the FSA considered that the circumstances of the breaches were serious, the FSA did not consider the breaches were reckless or intentional.

In a public statement regarding the FSA's findings dated 27 March 2013, the Board of Prudential confirmed that the Group Chief Executive acted at all times in the interests of the Company and with the full knowledge and authority of the Board. Prudential works diligently to maintain close and positive relationships with its regulators, and the Group's relationship with its UK regulators continues to be good.

Note:

1. Prudential plc was found to have breached Listing Principle 6 of the UKLA, requiring that "A listed company must deal with the FSA in an open and co-operative manner";
2. The Prudential Assurance Company Limited was found to have breached Principle 11 of the FSA's Principles for Businesses, requiring that "A firm must

deal with its regulators in an open and cooperative way, and must disclose to the FSA appropriately anything relating to the firm of which the FSA would reasonably expect notice"; and

3. Tidjane Thiam was found to have been "knowingly concerned" in The Prudential Assurance Company Limited's breach of Principle 11. The FSA accepted that the breach by Mr Thiam (and Prudential) was neither reckless nor intentional
- A Group holding by MAGIM in Storebrand ASA was not reported by the Disclosures team before the deadline as required under the Norwegian Securities Trading Act Rules. The disclosure, which related to an "above 5% holding", was made to the company and regulator on Friday 30th January 2015 at 17.31. As this was post close of business in Norway it was deemed to be received on Monday 2nd February, resulting in a breach of two days. The Norwegian regulator has now issued a "violation charge" of 100,000 Norwegian Kroner (approximately £8,400) against Prudential plc.
- 2) **In case of Indian Sponsor(s), details of all monetary penalties imposed and/ or action taken during the last three years or pending with any financial regulatory body or governmental authority, against Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company; for irregularities or for violations in the financial services sector, or for defaults with respect to share holders or debenture holders and depositors, or for economic offences, or for violation of securities law. Details of settlement, if any, arrived at with the aforesaid authorities during the last three years shall also be disclosed.**

Cases pertaining to ICICI Bank Ltd. (the Bank):

- Reserve Bank of India (RBI) has imposed penalty on the Bank in respect of the following:
  - In 2012, a penalty of Rs. 10,000/- for delayed filing of FC-GPR return for an FDI transaction of a customer. The Bank has paid the penalty of Rs. 10,000/- to RBI vide letter dated March 9, 2012.
  - Violation in opening and conduct of account of M/s SpeakAsia Online Pte Ltd resulting in penalty of Rs. 3.0 mn being imposed by RBI which was paid in October 2012.
  - Penalty imposed of Rs. 66,000/- for bouncing of 2 SGL deals which was paid in May 2012.
  - On June 10, 2013, RBI imposed a penalty of Rs. 10.01 million on ICICI Bank, in exercise of the powers vested with it under the provisions of Section 47(A)(1)(c) read with Section 46(4)(i) of the Banking Regulation Act, 1949 and subsection (3) of section 11 of FEMA on operating matters pertaining to KYC. The Bank has paid the penalty to RBI.
  - On July 25, 2014, RBI imposed a penalty of Rs. 4.0 million on the Bank, in exercise of powers vested with it under the provisions of Section 47A(1) of the Banking Regulation Act, 1949 with respect to facilities extended to a corporate borrower by the Bank. The Bank vide letter dated August 7, 2014 has paid the penalty to RBI.
  - On December 17, 2014, RBI imposed a penalty of Rs. 5.0 million on the Bank in exercise of powers vested with it under the provisions Section 47A(1)(c) read with Section 46(4)(i) of the Banking Regulation Act, 1949 for charges of non-compliance with the directions/guidelines issued by

Reserve Bank of India in connection with Know Your Customer (KYC)/Anti Money Laundering (AML). The Bank has paid the penalty to RBI on December 30, 2014.

- A penalty of Rs. 1.4 million was imposed on the Bank in February 2015 by the Financial Intelligence Unit, India (FIU-IND). The Bank has filed an appeal against the penalty, which was imposed for failure in reporting of the attempted suspicious transactions pertaining to media sting incidents.

- 3) **Details of all enforcement actions taken by SEBI in the last three years and/ or pending with SEBI for the violation of SEBI Act, 1992 and Rules and Regulations framed there under including debarment and/ or suspension and/ or cancellation and/ or imposition of monetary penalty/adjudication/enquiry proceedings, if any, to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel (especially the fund managers) of the AMC and Trustee Company were/ are a party. The details of the violation shall also be disclosed.**

The Securities and Exchange Board of India (SEBI) had issued a show cause notice to the Bank under SEBI (Procedure for Holding Inquiry and imposing Penalties by Adjudicating Officer) Rules, 1995 for delay of 81 days in filing disclosures under the SEBI (Prohibition of Insider Trading) Regulations 1992, for change in shareholding exceeding 2% in a listed Company, when prior shareholding exceeded 5 %. This was in respect of Bank's holding in Jord Engineers India Ltd which was largely unlisted, and trading in the scrip was suspended, though the Company was listed. The bank filed consent terms and paid Rs. 1 lac to SEBI pursuant to the consent order passed in May 2012.

- 4) **Any pending material civil or criminal litigation incidental to the business of the Mutual Fund to which the Sponsor(s) and/ or the AMC and/ or the Board of Trustees /Trustee Company and/ or any of the directors and/ or key personnel are a party should also be disclosed separately.**

As per the SEBI (MF) Regulations, mutual fund schemes are permitted to invest in securitised debt. Accordingly, few schemes of ICICI Prudential Mutual Fund ("the Fund") had made investment in certain Pass Through Certificates (PTCs) of certain special purpose vehicles / securitisation trusts ("the Trusts"). The returns filed by few of these securitisation Trusts whose PTCs were held by the Fund were taken up for scrutiny by the Income Tax Authorities for Assessment Years 2007-08, 2008-09, 2009-10 and 2010-11. Arising out of this, they had raised a demand on such Trusts. On failure to recover the same from them, they sent demand notices to the Fund along with other Mutual Funds as beneficiaries / contributors to such Trusts. The Fund in consultation with its tax & legal advisors has contested the applicability of such demand and proceedings there on are still pending.

- 5) **Any deficiency in the systems and operations of the Sponsor(s) and/ or the AMC and/ or the Board of Trustees/Trustee Company which SEBI has specifically advised to be disclosed in the SID, or which has been notified by any other regulatory agency, shall be disclosed:**

Nil

## GENERAL INFORMATION

- **Power to make Rules**

Subject to the Regulations, the Trustee may, from time to time, prescribe such terms and make such rules for the purpose of giving effect to the Scheme with power to the AMC to add to, alter or amend all or any of the terms and rules that may be framed from time to time.

- **Power to remove Difficulties**

If any difficulties arise in giving effect to the provisions of the Scheme, the Trustee may, subject to the Regulations, do anything not inconsistent with such provisions, which appears to it to be necessary, desirable or expedient, for the purpose of removing such difficulty.
